## D8.3

# Interim Dissemination and Communication Report

Editor(s)	John Kaldis
Lead Beneficiary	UNISYSTEMS
Status	Final
Version	1.00
Due Date	30/06/2021
Delivery Date	16/07/2021
Dissemination Level	PU

DataVaults is a project co-funded by the European Commission under the Horizon 2020 Programme (H2020-ICT-2019-2) under Grant Agreement No. 871755 and is contributing to the BDV-PPP of the European Commission.

HORIZON 2020 – 871755 – DataVaults	D8.3 – Interim Dissemination and Communication Report
------------------------------------	---

<b>Project</b>	DataVaults – 871755
<b>Work Package</b>	WP8 – Dissemination and Communication Activities
<b>Deliverable</b>	D8.3 – Interim Dissemination and Communication Report
<b>Editor(s)</b>	UNISYSTEMS – John Kaldis
<b>Contributor(s)</b>	ALL Partners through entries in the dissemination Tracker
<b>Reviewer(s)</b>	FRAUNHOFER – Yury Glickman ETA– Marina Da Bormida UBITECH – Giannis Ledakis

<b>Abstract</b>	An analysis of the progress according to the Dissemination Plan, the Communication Plan and the Stakeholder Engagement Strategy within the first 18 months of DataVaults, combined with specific performance metrics and KPIs, as well as indicative entries of the engagement and dissemination online tracker

## Terms and Abbreviations

Acronym - Abbreviation	Description
BSCW	“Basic Support for Cooperative Work” (The collaborative workspace web-based software, developed by the Fraunhofer Society, used in DataVaults)
EC	European Commission
CA	Consortium Agreement
GA	Grant Agreement
GDPR	General Data Protection Regulation (GDPR) in the EU
KPI	Key Performance Index
Mx	Month (where x defines a project month e.g. M10)
MSx	project Milestone (where x defines a project milestone number e.g. MS3)
NDA	Non-Disclosure Agreement
NPD	New Product Development
PO	Project Officer
UGC	User Generated Content
USP	Unique Selling Proposition
WPx	Work Package
Tx.x	Task (as per Grant Agreement)

# 1 INTRODUCTION

## 1.1 SCOPE- EXECUTIVE SUMMARY

The present deliverable D8.3 is prepared in the context of Work Package 8 exemplifying the extrovert activities of the dissemination and communication team of DataVaults, performed in the period M3-M18. Building upon the analytic plan and the overall strategy introduced in D8.1 (M2), and by employing the digital channels instantiated in M3 as reported in D8.2, the cross-cutting function of this work package has the side role of supporting initiatives such as the recent stakeholder feedback online multilingual survey, the demonstrator evaluation within WP6, and the live stakeholder feedback capturing during workshops and webinars with online survey and audience interaction tools like sli.do, while obviously focusing on the main “core” role of the work package which requires addressing the multitude of external stakeholders of DataVaults through all available channels. These activities include building a critical mass community and engaging in synergies and liaisons with projects, initiatives, associations and even potential exploitation targets and/or market links; as it becomes evident in the dedicated section about industry liaisons. DataVaults aspires to be a focal point of collaborative efforts and has built on its strong networking with the Citizen Personal Data Initiative within the context of EC Smart Cities Marketplace, the common activities with BDVA (Big Data Value Association) as a strategic collaborator, and the MCE Major Cities of Europe affiliation. Moreover, a large pool of affiliated projects with common objectives has been gathered through partner networking and a series of common initiatives, events, workshops and dissemination activities have been mutually agreed with them, proving that joint dissemination multiplies the impact and the diffusion of knowledge.

The recent COVID19 global situation has been an opportunity rather than an obstacle for DataVaults to enhance its online presence and reach-out through digital channels and online events, given the fact that “physical presence” in events was forbidden. Hence the relevant KPIs and targets have been substantially exceeded in several cases, namely in liaisons, online workshops-webinars, digital presence etc. On the other hand of course, “physical presence” activities such as exhibitions, booths, printed material for them, printed communication tools like roll-ups and banners had no meaning in this unprecedented global pandemic and were postponed for the second half of the project. Nevertheless, this deliverable coincides with the multitude of several other technical deliverables also due in M18 concurrently. This implies that several activities will begin to mature technically from this point on (as we are still in the design phase of DataVaults), hence in the second half of the project we expect to be able to produce more articles, publications, blogposts as well as of course to be able to showcase the achievements of all the other technical work packages and the DataVaults demonstrators, proving the added value of our novel personal data platform.

## 1.2 DOCUMENT STRUCTURE

The current document is structured along these lines:

Section 2, following this introductory section 1, showcases the project videos, the social media and digital channel presence, and presents analytic statistics.

Section 3 is devoted to the Events, webinars and workshops which we organized, co-organized or simply participated in.

Section 4 presents the networking efforts that have led to a substantial number of liaisons and synergies.

Section 5 particularizes on the target organisations, industry links and potential adopters of our platform from the real market.

Section 6 illustrates the publication based activities.

Section 7 illustrates several other important dissemination and communication activities.

Section 8 summarizes the targets, metrics and KPIs of our actions.

Section 9 is the concluding section.

Appendices A1, A2, and A3 include analytic tables of the dissemination and engagement tracker.

---

### 1.3 STRATEGIC CONSIDERATIONS IN DISSEMINATION COMMUNICATION

---

For reasons of brevity, we do not iterate the overall plan as presented in D8.1, yet we remind the interested reader that the dissemination team considers the following action path (mentioned in; but adapted from D8.1).

We do not seek passive communication rather than active and long term engagement with various stakeholders. When building critical mass communities, and especially when delivering multi-sided platforms as in the case of DataVaults, engagement can take the form of:

- 1) Captured members and registrants in the project portal and in the future in the Brokerage Platform
- 2) Followers of social media channels and /or disseminators (hence advocates)
- 3) Retention of previously captured members (as one-time engagement does not guarantee long term retention)
- 4) Physical participation in DataVaults events, hackathons, workshops, and other dissemination actions (given COVID19 restrictions)
- 5) Participatory contribution in all digital channels (as UGC user Generated Content must be encouraged and leveraged)
- 6) Active synergies, joint activities and collaborations with affiliated projects, clusters and initiatives
- 7) Active Industry/Corporate stakeholder capturing (the most coveted target of exploitation strategies)
- 8) Or (in the simplest case) just raise awareness to diverse stakeholders as the first step towards the marketing/engagement funnel (see below)
- 9) DataVaults Differentiation and Anchor Branding in a Cluttered Market Space of Personal Data Solutions and Data Platforms

## 1.4 METHODOLOGIES, ADHERENCE AND COMPLIANCE TO GUIDELINES

The present document as well as the overall communication and dissemination strategy of DataVaults, takes into account and adheres to:

- 1) the relevant EC and H2020 Guidelines such as
  - a. H2020 Communicating EU research and innovation guidance for project participants [1]
  - b. Social media guide for EU funded R&I projects (H2020 Guidance) [2]
  - c. HORIZON 2020 Communication Dissemination and Outreach (2018) [3]
  - d. H2020 New Social Media Guidelines for Beneficiaries [4]
- 2) The “PEDR H2020” (Guide Plan for Dissemination and Exploitation) [5,6]
- 3) The Relevant Guidelines of IPRHELPdesk.eu and H2020 Common Support Centre/J5 and the CEB (Common Exploitation Booster) [7-20]

Furthermore, based on the experience of the DataVault’s dissemination team, both in the corporate world as well as in a large portfolio of Research and Development EU funded projects, we combine our strategy on extrovert activities with world renowned best practices, and we expand our methods of communication as well as our tactical approach on digital channels with:

- 1) Strategies for Online Communities (ex [35])
- 2) An Integrated Approach to Online Presence and Social Media (ex. [37-42] et al.)
- 3) Relationship between online engagement and advertising effectiveness [32], etc.

## 1.5 DISSEMINATION AND ENGAGEMENT ONLINE TRACKER

This online Tracker, referenced throughout the deliverable is part of the process applied to effectively monitor and assess the dissemination and communication activities implemented within the project. For the online and direct collection of information related to the dissemination activities implemented by the partners, as well as easy reporting and follow-up, this online collaborative spreadsheet (also stored in the BSCW repository) consists of seven (7) sections and is made available to partners while constantly being monitored and expanded according to the needs by the dissemination team. Compliance to privacy and security guidelines, dictates that only parts of the tables and parts of the partner entries are included in this public deliverable, **without disclosing** any sensitive or private information. Nevertheless the following snapshots clearly depict the tracker, which is obviously fully available to the European Commission Services and the DataVaults partners for review under confidentiality terms.

## 2 DIGITAL CHANNELS – SOCIAL MEDIA

### 2.1 VIDEOS – DATAVAULTS YOUTUBE CHANNEL

#### 2.1.1 Relevant Metric, Target, KPI

The GA foresees 1+5 Videos produced, i.e. one for the project and the five demonstrators. This metric has already been reached, as we have already uploaded in the DataVaults YouTube Channel:

- One introductory Video for the project (DataVaults made simple)
- Four introductory videos for the demonstrators
- One video from the recent 3<sup>rd</sup> Workshop within the “Smart Cities Marketplace Initiative”

Moreover, 4 videos of DataVaults are live in the affiliated YouTube Channels of BDVA and Major Cities of Europe.

Nevertheless, we will continue this effort with even more videos, because according to the agreed plan, we will add (at least):

- Five more mature videos about the demonstrators, once these are complete
- One showcase, descriptive video about the DataVaults platform, once technical aspects and tasks progress
- Several more videos from recorded events, webinars, the planned hackathon etc. (Note that the indicative video uploaded from the 3<sup>rd</sup> workshop is only the beginning and more will follow once the recordings are available to the dissemination team.

This should help us surpass by far the initially set metric by M36.

#### 2.1.2 DataVaults YouTube Channel

The DataVaults YouTube Channel can be accessed at

<https://www.youtube.com/channel/UCJq66wrUyTGbs37UW-iSydA>

Although the channel was initiated from M2, it was only recently that relevant content (i.e. videos) were made available from the various technical work packages, hence uploads are only 1-2 months old. Nevertheless we have already achieved a promising number of views and subscribers, which should drastically increase in the next 18 months, when more content will be available and more time will be available for the prospective audience to start building a “critical mass”. Indicative statistics follow in the graph below. It should be noted that No paid boosting has been employed yet (in the form of Google Analytics Promotions), but we might consider employing this tool towards the end of the project if deemed appropriate. All uploads include the curated entries:

- Brief Descriptions
- Relevant Hashtags
- Designated appropriate Audience

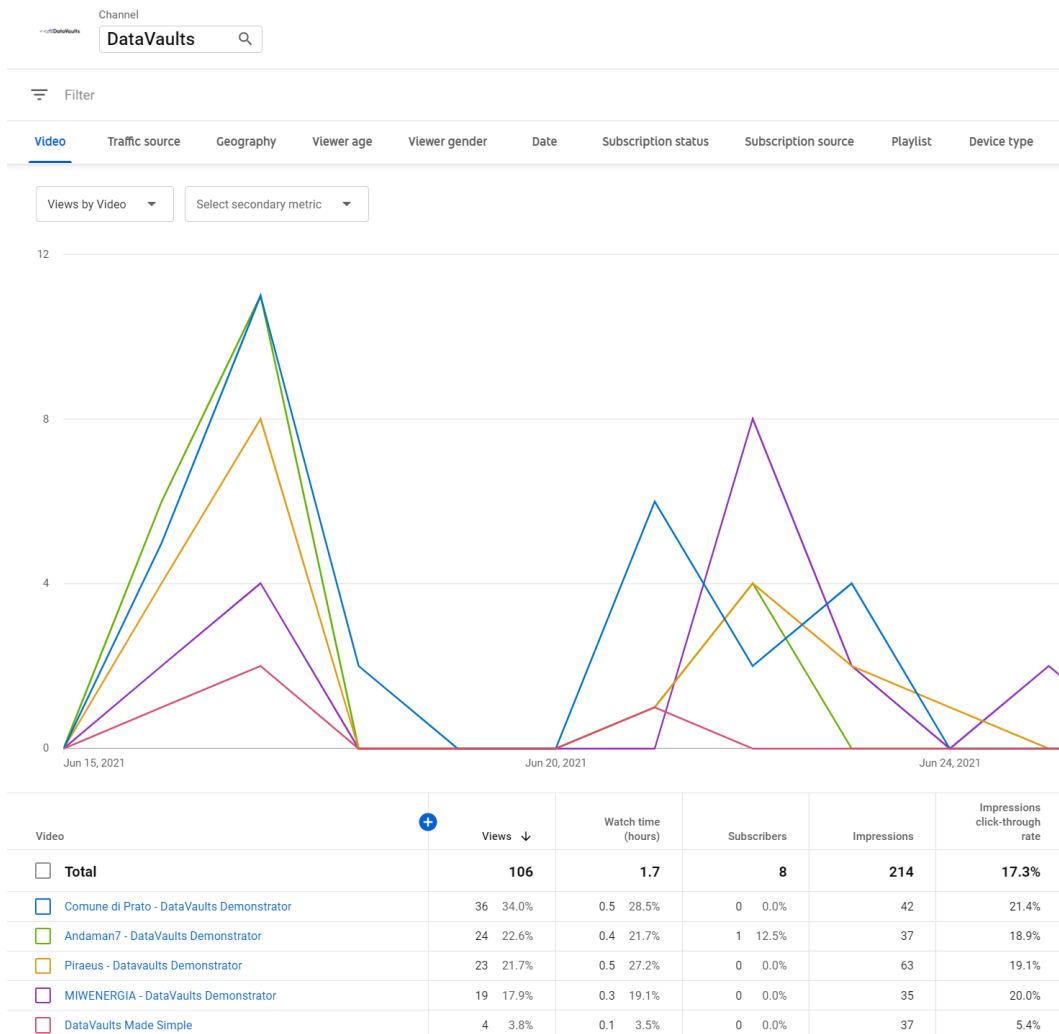

Figure 2: Indicative DataVaults YouTube Channel Analytics (June 2021)

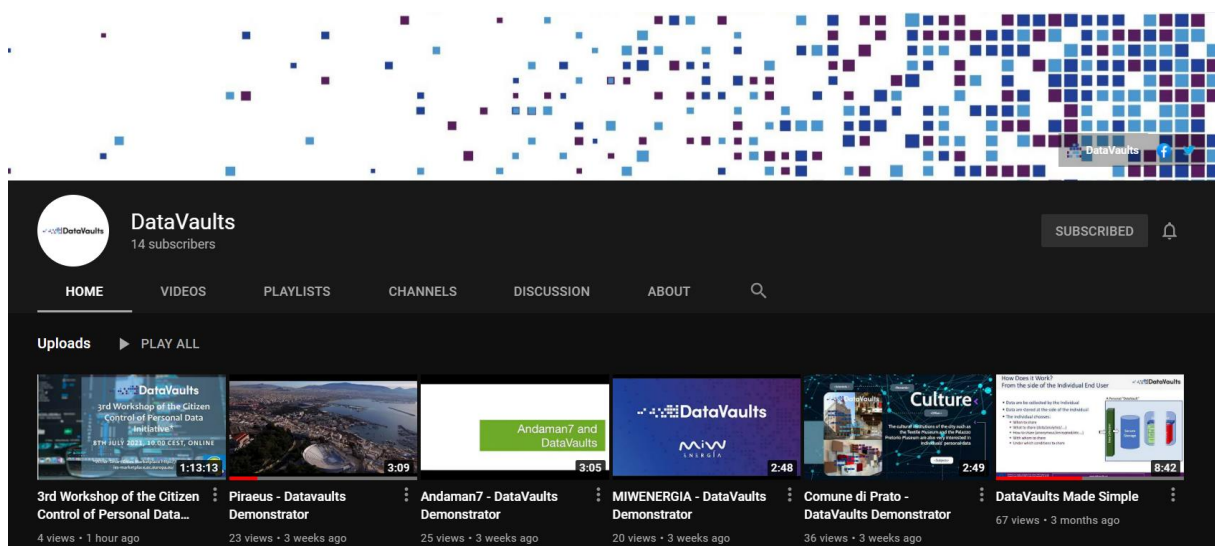

Figure 3: DataVaults YouTube Channel

### 2.1.3 YouTube Video “DataVaults Made Simple”

The introductory video to DataVaults, conveniently named “DataVaults made simple” has been used among others for a quick introduction within workshops, webinars and while approaching 3<sup>rd</sup> party stakeholders, in tandem with a key DataVaults introductory presentation and links to the various social media channels given to the interested parties.

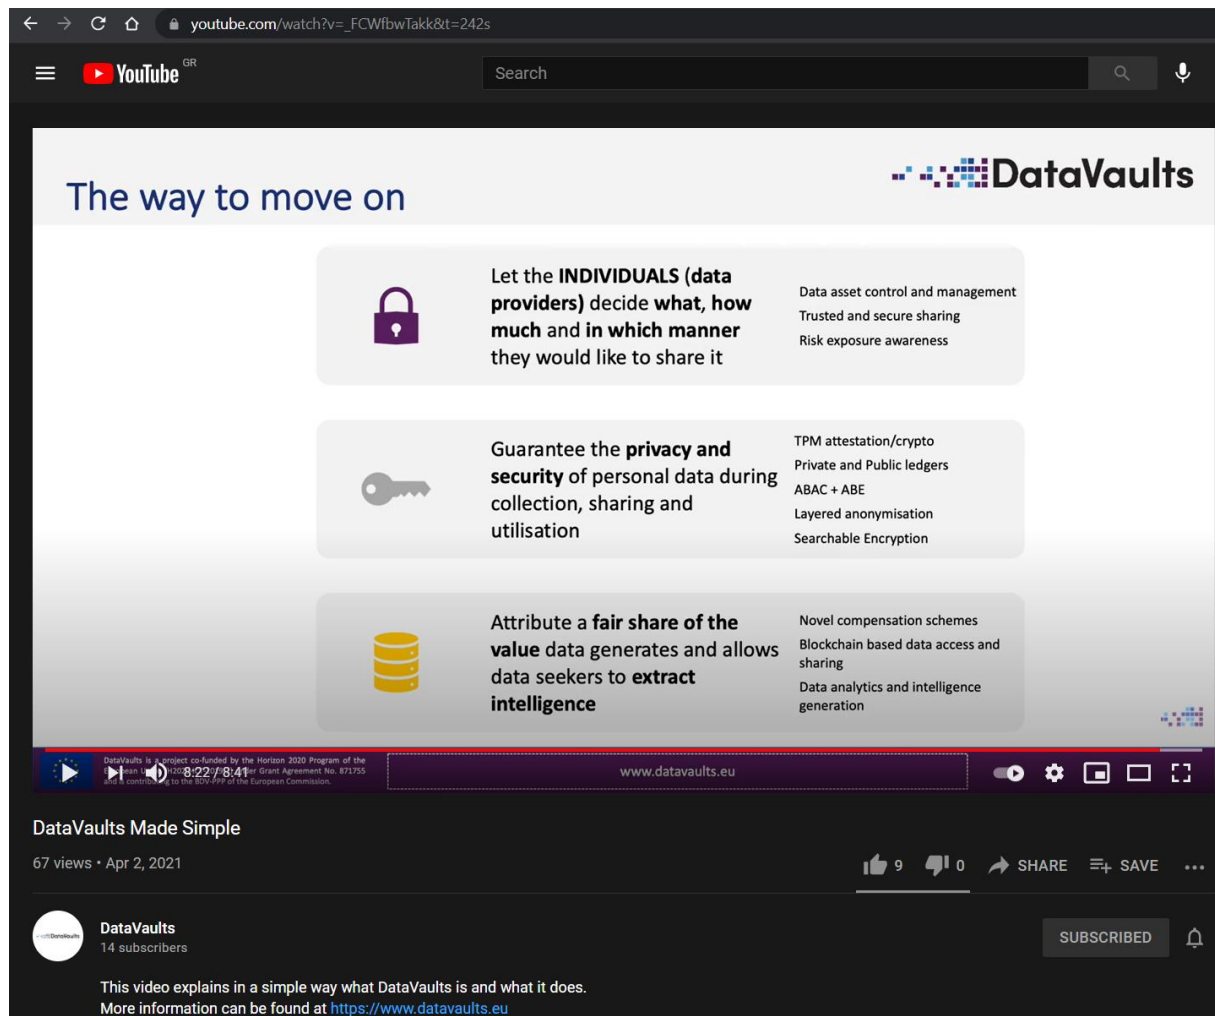

Figure 4: DataVaults “Made Simple” Video

### 2.1.4 Demonstrator Introductory YouTube Videos

Four out of Five demonstrators have already prepared “initial-introductory” versions of videos. It is expected that they will also produce another video at the final stages of the project, once technical issues have progressed and we will be in the position to exemplify exactly how each demonstrator has deployed and benefited from our project. In order to differentiate from other types of videos, a playlist dedicated to DataVaults Demonstrators has been created at:

<https://www.youtube.com/playlist?list=PLSOTAUCdqJpmrlzb5i6xq675pU7SqTEIZ>

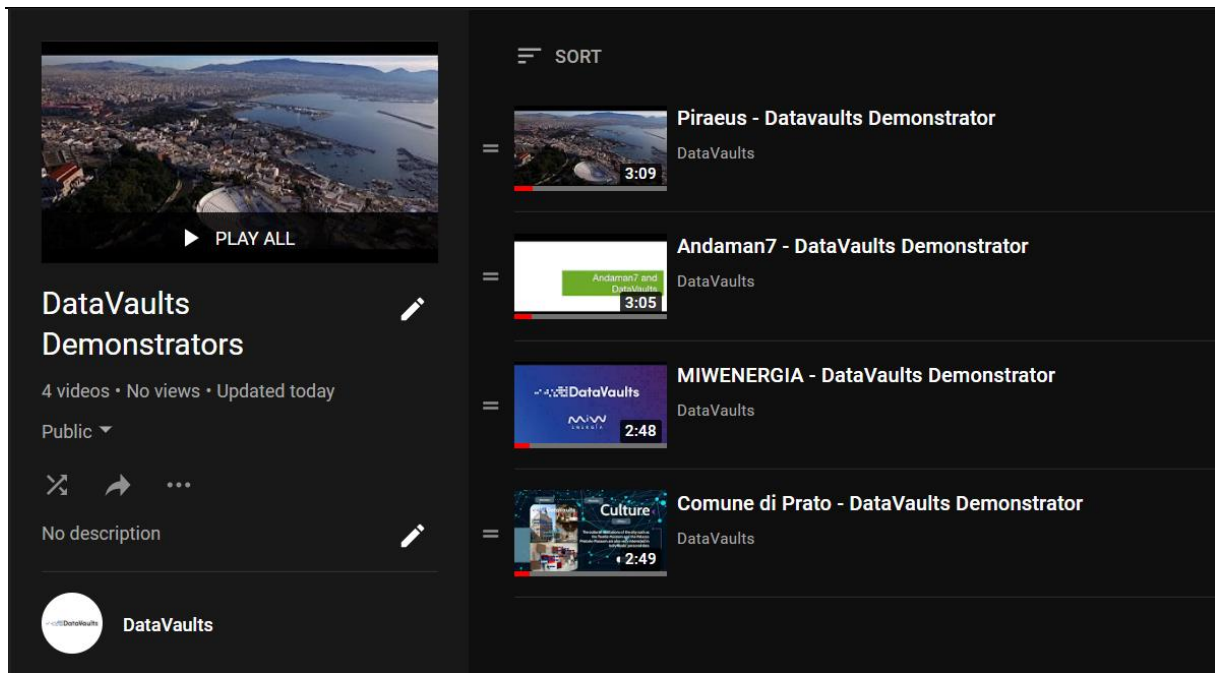

Figure 5: DataVaults Demonstrators Video Playlist (4 Videos)

### 2.1.5 DataVaults on External YouTube Channels

Notably, YouTube videos about DataVaults can also be found in other, external channels to ours, i.e. in those of affiliated entities. These videos have also been used promotionally in various Social Media posts as well. The following subchapters mention our videos on the YouTube Channels of:

- Major Cities of Europe
- BDVA (Big Data Value Association)

### 2.1.6 DataVaults at Major Cities of Europe (1 Video & 1 planned)

Through our strategic alliance with “Major Cities of Europe” coordinated by PRATO on behalf of DataVaults we proceeded to various dissemination and common post activities, including the video found in their YouTube channel at

<https://www.youtube.com/watch?v=Wy2pdZ2zucA&t=2s>

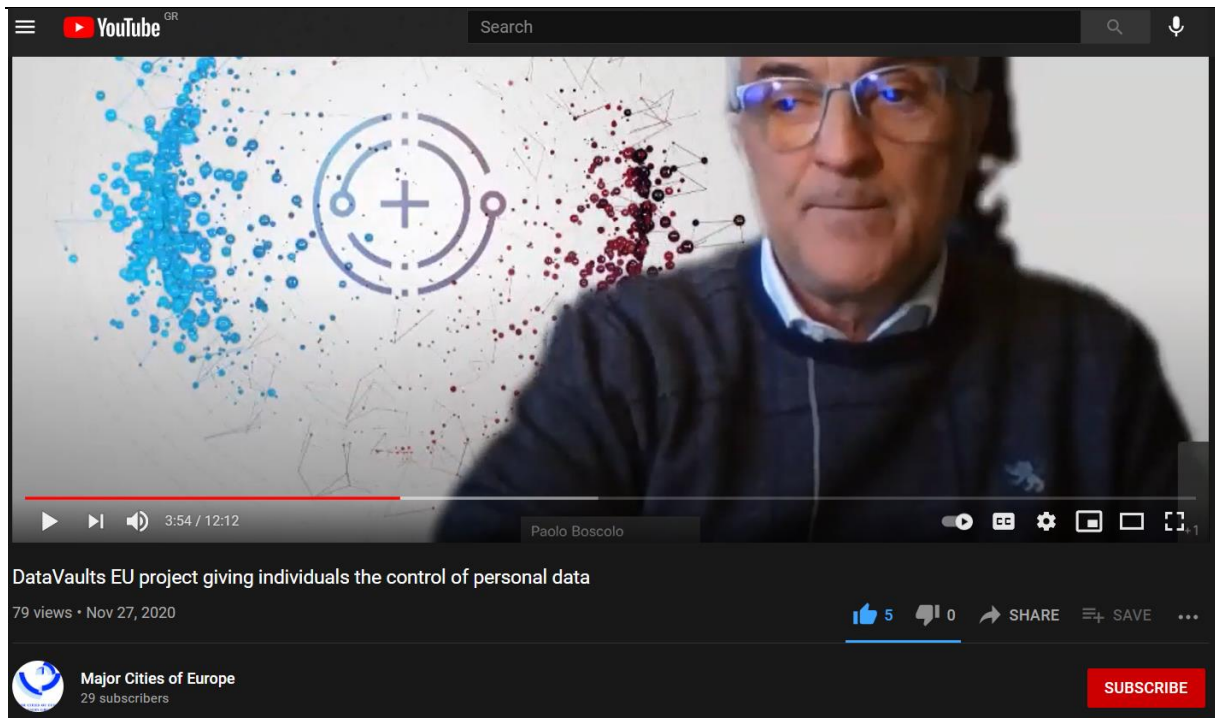

Figure 6: DataVaults Video on Major Cities of Europe YouTube Channel

At the time of writing the present deliverable **another video** is also being planned, and the mutual intention is for MCE to produce a new video interview as a round table among the DataVaults demonstrators, to discuss the project test beds and related issues.

#### 2.1.7 DataVaults at BDVA Big Data Value Association (4 Videos)

The strategic collaboration with BDVA (Big Data Value Association) includes a multitude of common posts, activities, webinars etc. explained in detail in other chapters of the present deliverable. In the BDVA official YouTube Channel a total of 4 videos from DataVaults can be found. Three of them were events **organized by DataVaults** (as leader), and one is a **Participation / Co-Organization**.

The videos refer to the events/workshops that DataVaults either directly organized, or co-organized through networking contacts (for more information on these events see the events section and the BDVA subchapter that follows):

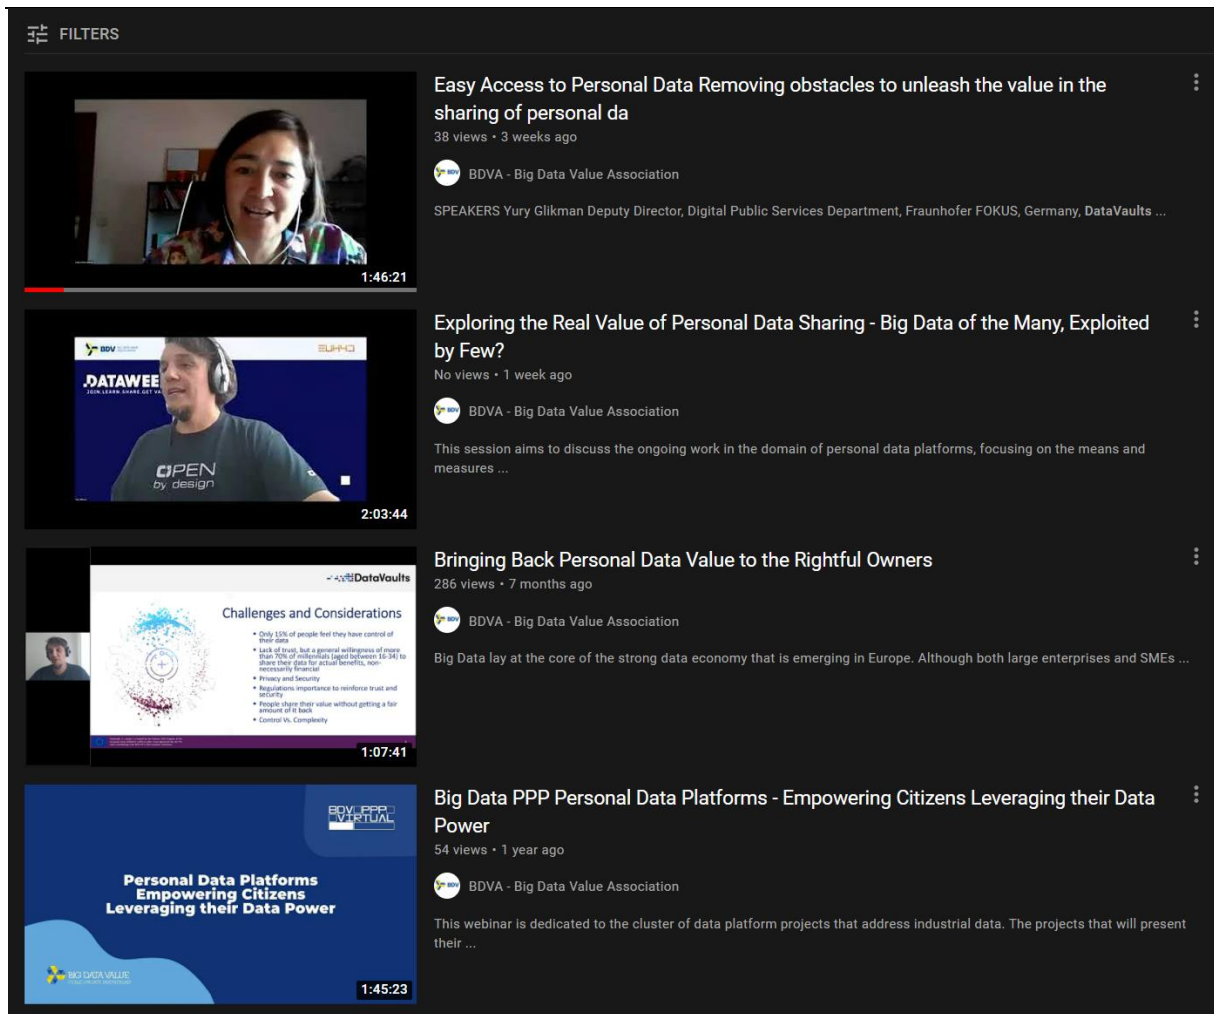

Figure 7: DataVaults Videos on BDVA YouTube Channel

### 2.1.8 DataVaults Website Videos Gathered

Note that all videos are also posted in the main “hub” of our digital presence i.e. the [www.datavaults.eu](http://www.datavaults.eu) website and can be found in the dedicated section under the “communication material”:

<https://www.datavaults.eu/material/communication-material/#videos-material>

## 2.2 SOCIAL MEDIA CHANNELS

### 2.2.1 Facebook

Facebook account: [www.facebook.com/DataVaults-H2020-Project-104528694494271/](https://www.facebook.com/DataVaults-H2020-Project-104528694494271/)

We present indicative analytics for the period M1-M18 and posts ordered by reach.

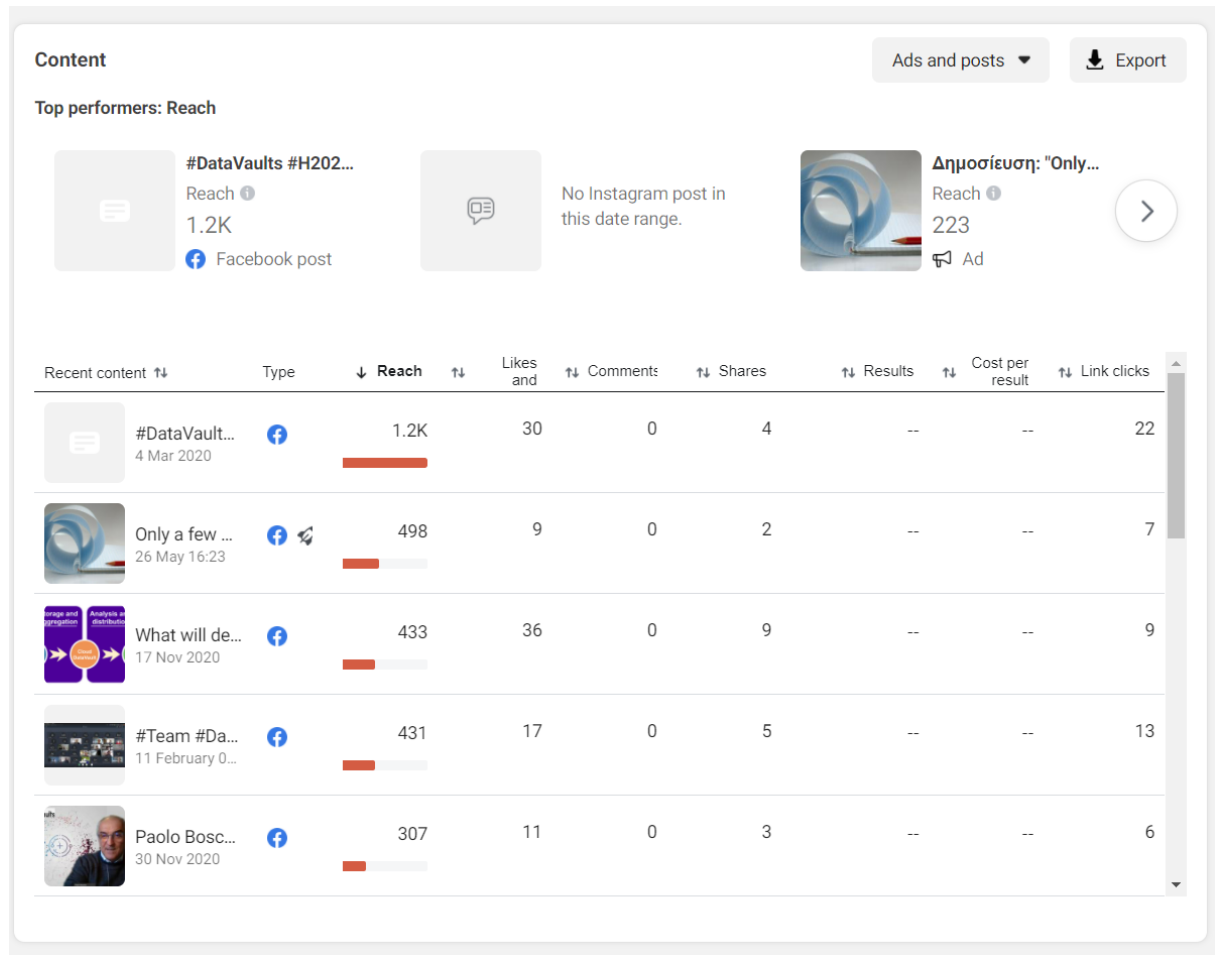

Figure 8: DataVaults Facebook posts ordered by Reach

Facebook Page Statistics (M1-M18)	Metric
Total "Reach" Calculated by Facebook	4051
Total Likes and Interactions	236
Total Shares	40
Total Posts (no re-posts)	36
Total Page Likes (followers)	69

Table 1: Facebook key statistics

## 2.2.2 Twitter

Twitter account: <https://twitter.com/DataVaultsH2020>

Figure 9: DataVaults Twitter Profile

Twitter Statistics (M1-M18)	Metric
Followers	158
Following	169
Total Posts	49

Last 3 Months (M15-M18)	Metric
Impressions	13600
Clicks	30
Re-tweets	47
Likes	114
Interactions	191

Table 2: Twitter key statistics

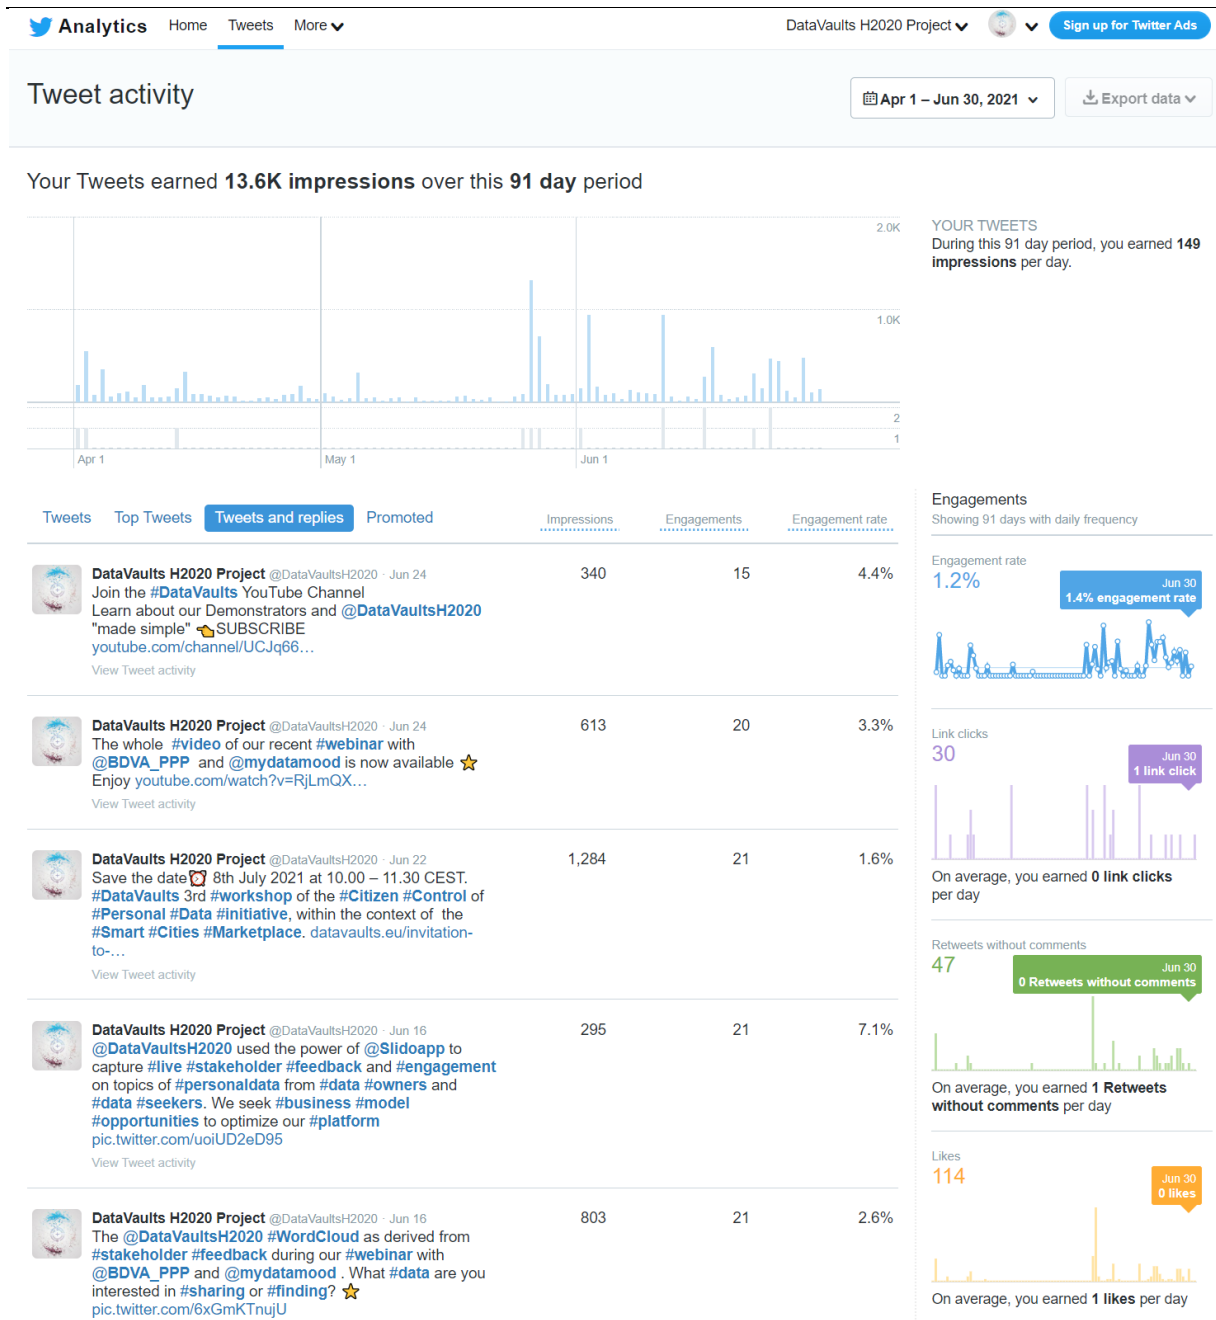

Figure 10: DataVaults Twitter Statistics last 3 months (M15-M18)

**Note:** Unfortunately, we have not been able to extract Twitter statistics for the entire (M1-M18) period (twitter seems to disallow this, but we will look into this in more detail). This means that the reported interactions only for (M15-M18) i.e. clicks, re-tweets, likes, are **substantially larger** than the ones reported here for the entire duration of the first half of the project.

### 2.2.3 LinkedIn (dual accounts)

We are employing **dual LinkedIn accounts**. We have opted to have the DataVaults “company” account and the “person” account.

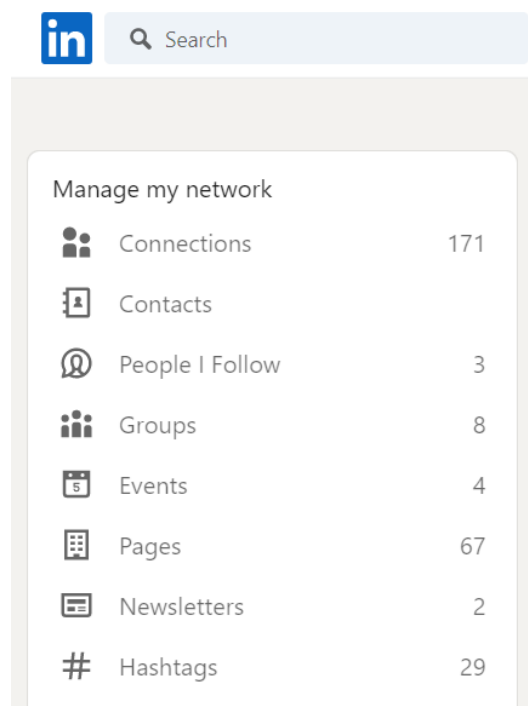

SECONDARY: LinkedIn company

[www.linkedin.com/company/datavaults-h2020-project/](http://www.linkedin.com/company/datavaults-h2020-project/)

MAIN: LinkedIn project (as a “person”)

<https://www.linkedin.com/in/datavaults-project-93b4591a4/>

The reason is that due to LinkedIn peculiarities, the “company” account can only be followed passively but cannot affiliate, connect and make similar networking actions reaching out actively to the various stakeholders, so the “person” (Name: DataVaults, Surname: Project) is **used primarily** to reach out to people and affiliated projects or companies, which has achieved substantial number of affiliations and interactions as seen in the statistics below. Notice that some H2020 projects take the only first approach, while some others take only the second, but our dual approach (having both) seems to be working well for maximum reach. Only selected posts of the main LinkedIn account are re-posted to the secondary account, because it is the primary account that we wish to expand with connections.

LinkedIn Indicative Statistics (M1-M18)	Metric
Avg. Views per post	105
Engagement (last 12 months)	13.5%
Total Reactions-Likes-Shares	249
External Profile Views (last 90 days)	48

Figure 11: DataVaults LinkedIn Statistics

## 2.2.4 Other Aspects of Social Posts

### 2.2.4.1 Recurring announcements - Reminders

For events, workshops, webinars that we need to attract a critical mass, we make several repetitive posts. Example in the recent event indicated in the image below, we posted, then reposted-shared from BDVA, then posted on the same day, and then posted again in the last hour, in order to capture as many registrants as possible.

Figure 12: Recurring Event posts

### 2.2.4.2 Curating Content

We are using the “tone detector” in order to validate our text in posts and add hashtags and emojis that are relevant to each entry.

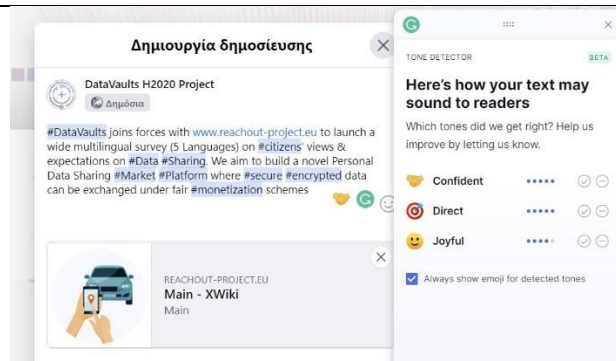

Figure 13: Curating DataVaults posts with Tone Detector

We also apply the A.B.L.E® Communication Guideline and 4 factor Testing methodology that was presented in D8.1. Choice of wording and hashtags are passed against the checklist:

- Consistent (with a common narrative);
- Compelling (encourages action);
- Relevant (important to the audience);
- Credible (believable by the audience);
- Different (not available everywhere, not boring);
- Defensible (against challenge).

#### 2.2.4.3 Promoting-Boosting the DataVaults Online Survey

It should be noted that we are only using free promotion strategies and have not used any paid boosting through Google Analytics, Facebook Analytics etc. The only exception was the DataVaults online Survey in 5 Languages. We have agreed that it is important for the project to achieve the widest possible impact, and to receive as much feedback as possible in this case. The results of this boosting action are presented in the last chapter of the present document.

## 2.3 DATAVAULTS WEBSITE

The DataVaults website [www.datavaults.eu](http://www.datavaults.eu) is a multi-sided hub for several activities. Apart from news and blogposts, we employ the event pages both for registration links for external stakeholders, and of course as a re-direct link in our social posts. Beyond from presenting the project results, we have dedicated pages for affiliations-synergies, for the Smart City marketplace Initiative with full information, documents, agendas for the events and participants, a dedicated page for the project videos, and many others that will keep on expanding as the project progresses.

The layout and menu-subsections of the website have been presented in D8.2 and we do not repeat them here, for reasons of brevity.

Indicative Traffic Statistics follow in the next graphs for the M1-M18 period and also for the last week indicatively.

### 3 EVENTS-WEBINARS-WORKSHOPS

#### 3.1 INTRODUCTION

Despite the well-known COVID19 situation, which has restricted physical presence events, DataVaults has devoted strong effort in the online events, and has managed to surpass the initial target set for M18, mainly due to the three strategic affiliations (also mentioned in several sections in the present deliverable), i.e.

- BDVA / DAIRO
- EC Smart Cities Marketplace – Citizen Personal Data Initiative
- MCE Major Cities of Europe

#### 3.2 EC SMART CITIES MARKETPLACE SERIES OF WORKSHOPS

Led by ASSENTIAN and embraced by the entire DataVaults consortium, this is a core hub of a series of workshops and webinars (4 already completed at the time of writing this document).

A dedicated page in our website includes all the relevant information about the initiative as well as agendas, reports and material for each event:

<https://www.datavaults.eu/material/liaisons-relevant-links/citizen-control-of-personal-data-initiative-citizen-focus-action-cluster/#about-citizencontrol-initiative>

The “Citizen Control of Personal Data” is an initiative within the EC Smart Cities Marketplace

<https://smart-cities-marketplace.ec.europa.eu/>

Smart Cities Marketplace Initiative within the Citizen Focus Action Cluster:

### “Citizen Control of Personal Data”

Figure 17: Citizen Control of Personal Data Initiative within Smart Cities Marketplace

Most events were organized by DataVaults, while in the matchmaking event we had a simple participation.

## The Smart Cities Marketplace

The [Smart Cities Marketplace](#) is an initiative supported by the European Commission that brings together cities, industry, small business (SMEs), banks, research and others.

It aims to improve urban life through more sustainable integrated solutions and addresses city-specific challenges from different policy areas such as energy, mobility and transport, and ICT.

It builds on the engagement of the public, industry and other interested groups to develop innovative solutions and participate in city governance.

**Figure 18: DataVaults dedicated webpage for the Citizen Control of Personal Data Initiative**

Participating affiliated entities include projects and initiatives such as: KRAKEN, i3 Market, SafeDEED, GLASS, PIMCITY, TRUSTS, MUSKETEER, OPERTUS MUNDI, SmashHit. OPEN DEI, MOSAICrOWN, InteropEHRate, DECODE, SMARTER TOGETHER, RUGGED, BDVA, TOREADOR, URBANITE, NORDIC EDGE, MyDataMood.es, and the list is always expanding

### 3.2.1 Launch Event – 27th January 2021

**Title:**

Launch of Initiative Citizen Control of Personal Data

**External Participants:**

Maria Sangiuliano (Chair Action Cluster Citizen Focus), Judith Borsboom (Action Cluster Coordinator) and Gabi Kaiser (Senior Expert and Communications), Georg Houben DG-ENER, Prof James Evans, Manchester Urban Institute, Representatives of other EU Funded Projects

### 3.2.2 1st Workshop, February 25th, 2021

**Title:** The Road to New DataVille

**External Participants:** KRAKEN project, ERASMUS Centre for Data Analytics Rotterdam, RUGGEDISED Project

### 3.2.3 2nd Workshop, April 14th, 2021

**Title:** 2nd Workshop of the “Citizen Control of Personal Data” Initiative

**External Participants:** Auroral Project, Urban Data Platform Initiative , Digitranscope Project, Marina Micheli, EU JRC, ANEC (voice of consumers in Europe).

### 3.2.4 Matchmaking Event, April 27th, 2021 (Participation)

**Title:** Valorisation of Personal Data in the Matchmaking Event

**External Participants:** 121 external participants, from 35 countries, in 83 Meetings

### 3.2.5 3rd Workshop of the Citizen Control of Personal Data Initiative 8th July 2021

**Title:** 3rd Workshop of the Citizen Control of Personal Data Initiative

**External Participants:** Safe-DEED, Business Models and Finance Cluster

## 3.3 BDVA – DATAVAULTS SERIES OF WORKSHOPS-WEBINARS

BDVA (recently renamed to BDVA / DAIRO) has been a strategic affiliation of DataVaults since the proposal stages. We have organized, co-organized or simply participated in several events, and we will continue to enhance our collaboration in the second half of the project.

### 3.3.1 DataVaults webinar with BDVe – 11<sup>th</sup> December 2020

**Title:** Bringing Back Personal Data Value to the Rightful Owners

Figure 19: DataVaults – BDVe Webinar “Bringing Back Personal Data Value to the Rightful Owners”

### 3.3.2 DataVaults at the Online Data Week 2021 – 26th May, 2021 (participation)

**Title:** Exploring the Real Value of Personal Data Sharing – Big Data of the Many, Exploited by Few? Or not any more?

### 3.3.3 DataVaults Webinar with BDVA and MyDataMood.es, 11th June 2021

**Title:** Easy Access to Personal Data Removing obstacles to unleash the value in the sharing of personal data (11 June 2021)

**Note:** for all the above mentioned events, videos are presented in the previous chapter and are hence not repeated here. More information for each one can be found in the news section of [www.datavaults.eu](http://www.datavaults.eu)

## 3.4 THE EVENTS TRACKER LIST

We have **47 distinct event** entries (**45 completed, 2 planned for near future**) in the relevant worksheet of the online dissemination and engagement tracker, at the time of writing the present deliverable.

We distinguish engagement in 2 general categories:

- DataVaults organizes (or co-organizes) through all or some partners
- DataVaults participates with some partners

Furthermore, the tracker has pre-assigned categories for easy filtering as follows:

Type of activities
Organisation of a Conference
Participation to a Conference
Participation to a Workshop
Participation to an Event (other)
Liaison with Research Cluster, Project, Community
Link with Industry, Clients, 3rd Party Stakeholder
Hackathon
Workshop / Webinar
Standardisation Activity
Other
Type of audience
Public administrations and regulators
Industry
Scientific Community / Research Community
Customers
General Public
Policy Makers
Other

Figure 20: Events Tracker Categorisation

Typical Table entries include 14 distinct fields as in the example below

EVENTS-WORKSHOPS-WEBSHARES 													
no.	Partner	Type of activities	PARTNER(S) participated	Description of contribution	Title of event	URL	Date	WITH	Place	Type of audience	Size of audience	Countries addressed	Comments
4	ASSENTIAN	Liaison with Research Cluster, Project, Community	Shawn Topham	Oral communication	Manchester Urban Institute agenda setting	<a href="https://www.mui-manchester.ac.uk/research/">https://www.mui-manchester.ac.uk/research/</a>	24/06/20		online	Scientific Community /	2	National	To discuss collaboration

Figure 21: Events Tracker Fields and Links

The full entries of the Events Tracker can be found in the **Appendix A2 (47 entries, 45 completed, 2 planned for near future)**.

### 3.5 OTHER EVENTS

#### 3.5.1 Through Liaisons and Synergies

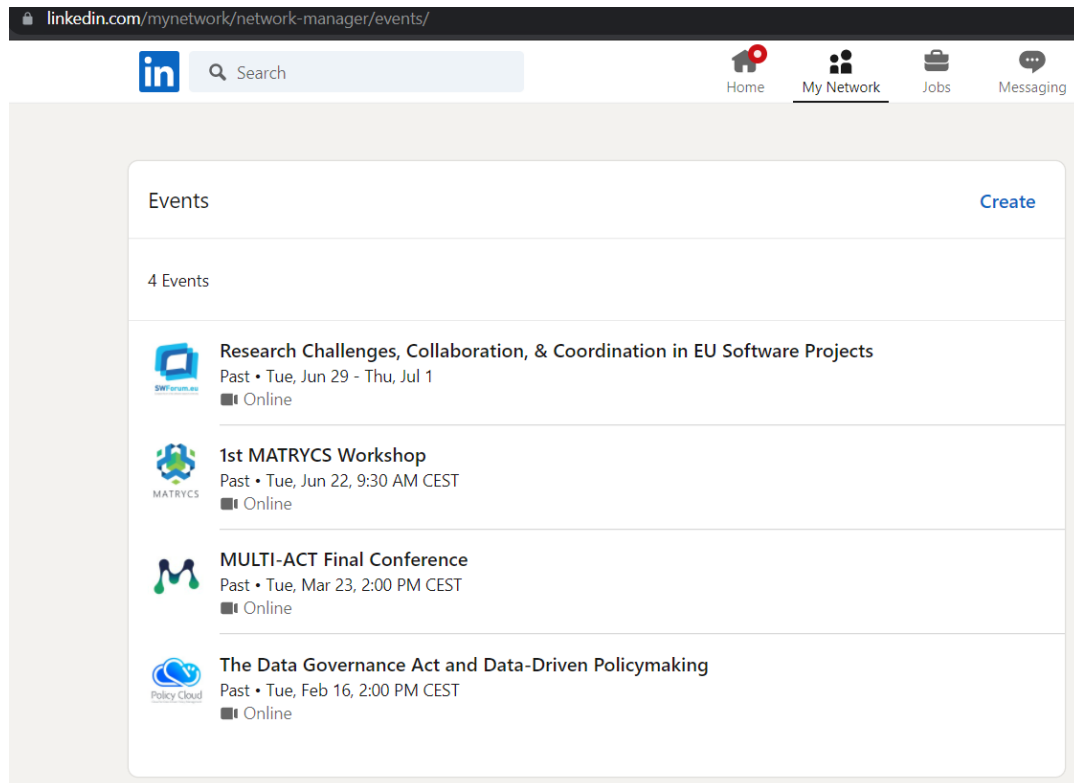

As analyzed in the next chapter we seek to expand our synergies, and collaborate in the widest possible level including common workshops and events with affiliated projects. For instance a common workshop with affiliated project DOME4.0 is agreed for the fall of 2021, where our projects will present their exploitable assets and produced results in an effort for common exploitation opportunities and common dissemination strategies. More such initiatives are

sought after with projects that include common partners (Example GLASS, InGOV, Rainbow, FutureTPM, Cybele and others).

### 3.5.2 3<sup>rd</sup> Party Online Events Participation through LinkedIn Affiliations

Although secondary to the “core” events that DataVaults organizes / co-organizes, we also try to expand our reach and participate in 3<sup>rd</sup> party events from various sources of affiliation / liaison. One such valuable channel is the DataVaults LinkedIn channel. Indicatively, we show 4 that we have attended online recently.

**Figure 22: 3RD PARTY ONLINE EVENTS PARTICIPATION THROUGH LINKEDIN AFFILIATIONS**

**Note:** Many affiliations (example projects) have events that we participate in with one or more DataVaults members, but they have not “opened” the relevant “LinkedIn event” category so these are not reported here. For all these events, we encourage the reader to see the dedicated section on the Engagement Online Tracker, in the next chapter.

## 3.6 UPCOMING BOOKED EVENTS

DataVaults will continue its strong presence in several events, and we are already aware at the time of writing this deliverable of (at least) the following, but it is certain that substantially more will be arranged until the end of the project:

### 3.6.1 European Big Data Value Forum (EBDVF)

Organized by BDVA/DAIRO both online and physically in Ljubljana, Slovenia, the EBDVF 2021 will take place during November 29 – December 3, 2021 (hybrid event). Link: <https://european-big-data-value-forum.eu/>

---

### 3.6.2 IoT Week 2021

The IoT Week 2021 will take place between August 31 – September 3, 2021 in Dublin, Ireland and DataVaults is planning to participate through one or more of its partners. Link: <https://iotweek.org/registration-and-ticket-options-dublin/>

---

### 3.6.3 Smart Cities Marketplace 5<sup>th</sup> Event

Under the leadership of DataVaults partner ASSENTIAN, we have recently successfully completed the 4<sup>th</sup> event/ webinar and we are looking forward to the 5<sup>th</sup> which is estimated to take place around the end of summer 2021.

## 4 PROJECT SYNERGIES – LIAISONS WITH CLUSTERS & INITIATIVES

### 4.1 STRATEGIC SYNERGIES

The following associations, clusters, groups are key strategic synergies (briefly also mentioned in the previous chapter) since a multitude of events are being organized with them and several more are planned for the near future:

#### 4.1.1 Major Cities of Europe

Major Cities of Europe has been a strategic partner of DataVaults through the introduction and leadership of Prato, in a multitude of common activities, ranging from videos, common posts, webinars, events, the aforementioned video in the previous section, a planned event and a newly produced video interview by MCE as a round table among the DataVaults demonstrators to discuss the project test beds and related issues, and many other parallel activities. More information can be found on their website:

<https://www.majorcities.eu/misc/eu-projects/datavaults/>

Moreover, we indicatively show their social post while they were assisting DataVaults in the wider possible dissemination of our online multilingual survey within the context of stakeholder feedback gathering.

Figure 23: MCE Major Cities of Europe promotion of DataVaults Multilingual Online Survey

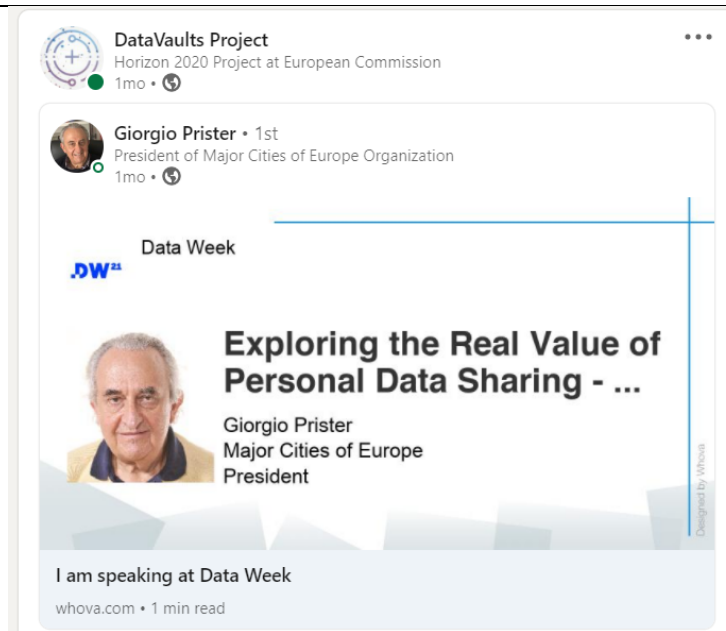

Figure 24: MCE Major Cities of Europe common events with DataVaults (BDVA DataWeek2021)

#### 4.1.2 EC Smart Cities Marketplace – Citizen Control of Personal Data Initiative

Led by ASSENTIAN and embraced by many DataVaults partners, this is a “reference” affiliation for DataVaults that has produced and will continue to produce several events, workshops, webinars and of course liaisons with the respective participants each time.

Smart Cities Marketplace Initiative within the Citizen Focus Action Cluster:

### “Citizen Control of Personal Data”

Figure 25: EC Smart Cities Marketplace – Citizen Control of Personal Data, Action Cluster

Common Activities and Events are mentioned in the dedicated section on the chapter about workshops and are not repeated here for reasons of brevity. A dedicated page on the initiative exists on the DataVaults website with very analytic content:

<https://www.datavaults.eu/material/liaisons-relevant-links/citizen-control-of-personal-data-initiative-citizen-focus-action-cluster/>

#### 4.1.3 BDVA / DAIRO

The BDVA (Big Data Value Association) recently renamed to BDVA/DAIRO has been a strategic partner of DataVaults since the proposal stages, and a multitude of events, workshops and

webinars have been conducted as illustrated in the relevant chapter about workshops, and are not repeated here for reasons of brevity. Notice that DataVaults not only participates (example Data Week 2021) but also organizes or co-organizes several events with BDVA (example the aforementioned recent stakeholder webinar on "Easy Access to Personal Data: Removing Obstacles to Unleash the Value in the Sharing of Personal Data" (11 June 2021)).

## DataVaults at the Online Data Week 2021 – 26th May, 2021

[Blog, News / By datavaults / May 18, 2021](#)

DataVaults will participate in this year's online Data Week 2021, with the track **Exploring the Real Value of Personal Data Sharing – Big Data of the Many, Exploited by Few? Or not any more?**. The event will take place on 26th of May, at 11:30 AM – 1:30 PM CET.

**Figure 26: DataVaults at the BDVA Online Data Week 2021**

## 4.2 REACHOUT AS DATAVAULTS ONLINE SURVEY FACILITATOR

DataVaults, being affiliated with H2020 ReachOut through the introduction of common partner Fraunhofer, has used the online platform of ReachOut in order to build our multilingual (5 language) online Survey addressed to stakeholders, data seekers and data consumers, that is reported in WP2 and WP6. We wish to thank one again H2020 Reachout for our fruitful collaboration and we believe that more such common initiatives can be pursued.

Figure 27: ReachOut H2020 Platform used for the DataVaults multilingual Online Survey

### 4.3 LINK EXCHANGES – COMMON SOCIAL POSTS

#### 4.3.1 Relevant Metric, Target, KPI

The Grant Agreement foresees among others, target / KPIs to achieve:

- Synergies with Projects >15
- Joint Activities, Joint Dissemination, Joint presence in Events >8
- Links to Project Website >8

We have already achieved (on M18) to **surpass these KPIs**, and we will continue our strong efforts during the second half of the project

More specifically:

#### 4.3.2 Web site Links in the Liaisons and Synergies Section

Thanks to intense networking efforts by partners through common projects and clusters, we have already achieved **37 liaisons** (see next section about the engagement tracker) out of which **22 liaisons** have already agreed to include DataVaults in their websites and we have already inserted their logos in our website. The remaining will also be contacted in the next months for this specific purpose of website linking as well. (At the last minute of typing this deliverable another two were also agreed, to make the current count **24 liaisons** -see below) and the list will be constantly expanding. Note: in the image below the company myDatamood.es is also mentioned with their logo, but this is not counted in the above number of projects, as it is instead categorized in the “Company-Industry Links” of the next chapter.

The intention in the devoted worksheet of the tracker is to note only projects with which we have strong collaboration (37 so far) (i.e. beyond simple social media posts and follows), to make common events, common workshops, common dissemination activities and to exchange links in each other’s website. We also have their agreement that the DataVaults logo and link with a brief text exemplifying the added value of our project to be added in their websites (24 so far agreed). To reciprocate we have devoted a section on our website at <https://www.datavaults.eu/material/liaisons-relevant-links/> (**SYNERGIES-LIAISON SECTION**)

### Synergies – Clustering

DataVaults enhances its synergies and joins forces with a group of affiliated projects in a multitude of common collaborative activities.

Our Clustering list is ever-expanding. Stay Tuned.

Figure 28: Website Link and Logo Exchange with Project Liaisons – Synergies

At the time of writing this deliverable all mentioned projects have agreed in writing for the link exchange, but not all have implemented it yet. (We will follow-up and expect to have this completed in the next 1-2 months at most from their side). Indicative example from Project Rainbow follows:

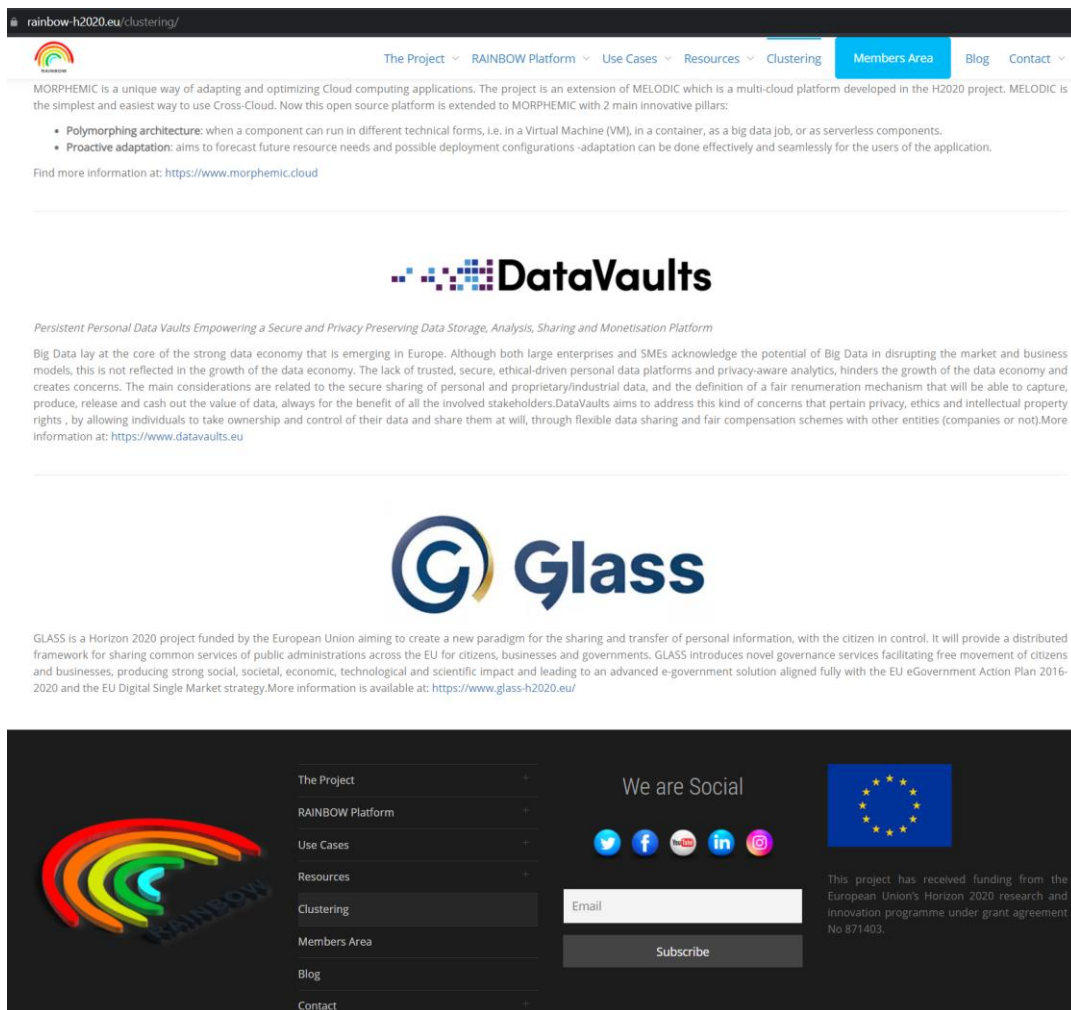

Figure 29: Indicative Website Link to DataVaults from Affiliated Project

#### 4.3.3 Constantly Expanding Strategic Project Synergies

Another prominent example is the project DOME4.0 (Digital Open Marketplace Ecosystem 4.0) H2020 GA 953163 which we have recently reached through common project partners-friends. We have not managed to insert them in our synergies website yet (which should happen in the next few days), but the important point is that beyond typical common social posts, we have agreed to have several meaningful activities:

- One **common Workshop-Webinar** around Fall 2021.
- One analytical presentation of each other's "Key exploitable results" and seek **common paths of joint exploitation** (related to WP7 "exploitation")
- We also intend to invite in the same Workshop-Webinar the affiliated projects **KRAKEN** and **i3-MARKET** (mentioned above).

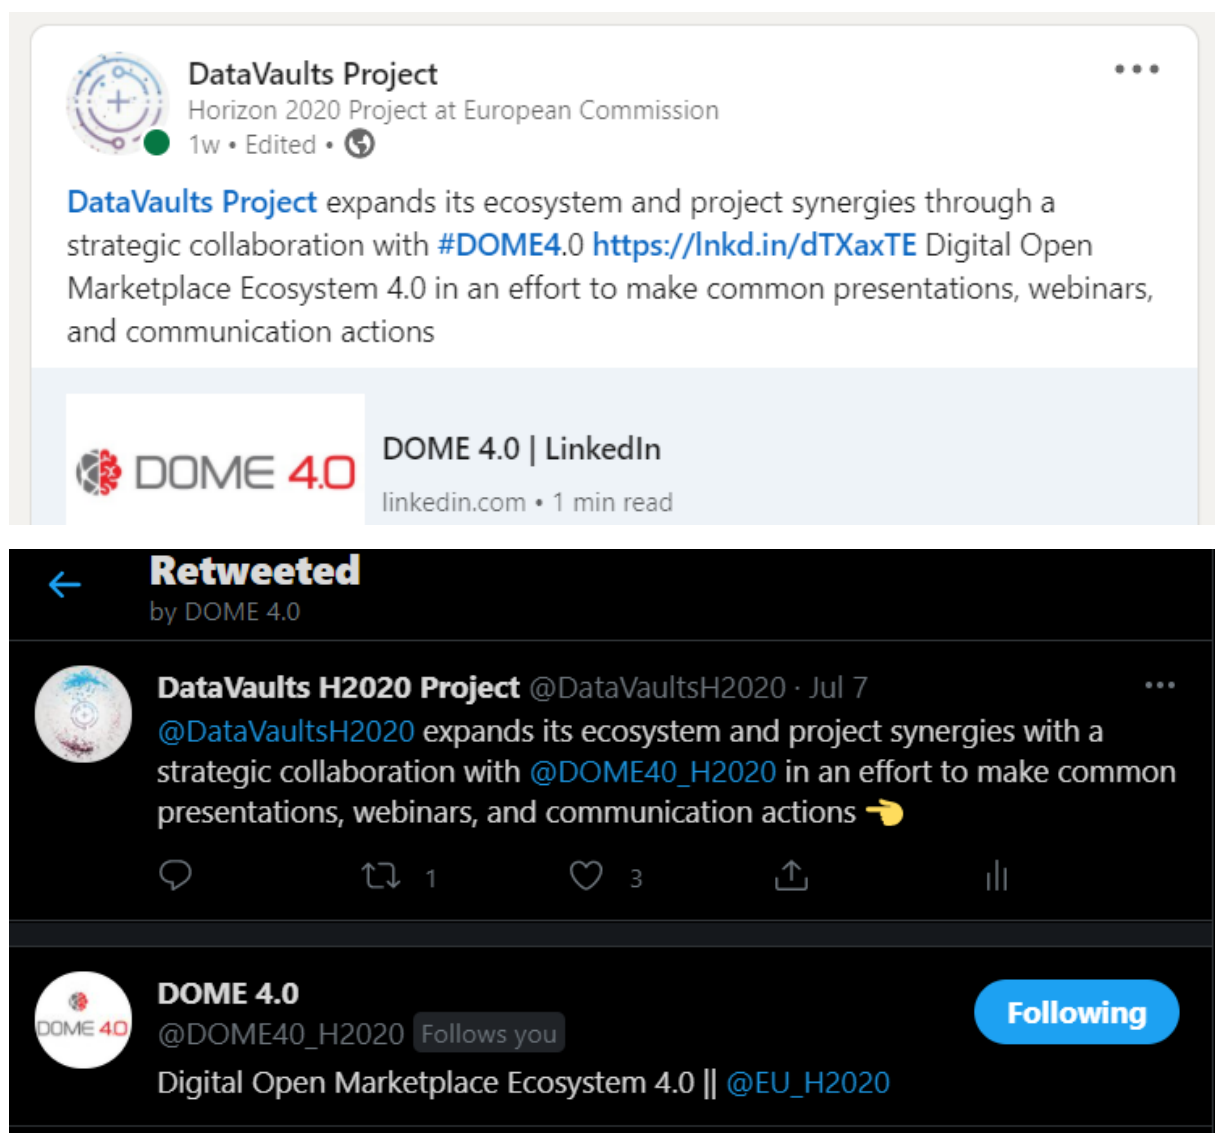

Figure 30: DataVaults and DOME4.0 common workshop planned

Another recent affiliation is SafeDEED <https://safe-deed.eu/> which we have recently reached through the latest event of the Citizens Initiative within the Smart City Marketplace. We have not managed to insert them in our synergies website yet (which should happen in the next

few days), but the important point is that beyond typical common social posts, we have agreed to have several meaningful activities like the recent workshop.

Figure 31: DataVaults and SafeDEED affiliation for common Events

Of course our list of affiliations and synergies, is “live” and ever-expanding.

#### 4.4 STANDARDIZATION - GOVERNMENTAL

As the project progresses in more technical parts we will be able to seek more standardization opportunities as well as other law formulation/governmental opportunities. Nevertheless through the efforts of ASSENTIAN and UBITECH we have already had common activities (as depicted in the online dissemination tracker) in four instances as follows:

Type of Affiliation	Name	URL	Other Joint Activity	Comment
Standardisation -Governmental	UN/ANEX in relation to CEN, CENELEC and ETSI	<a href="https://www.etsi.org/technologies/smart-cities">https://www.etsi.org/technologies/smart-cities</a>	proposed project entitled "services for the citizen"	Creating a group to feed in regarding citizen control of data.
Standardisation -Governmental	ANEC The European consumer voice in standardization	<a href="https://www.anec.eu/">https://www.anec.eu/</a>	Smart Cities Marketplace – Citizen Control of Personal Data Initiative	
Standardisation -Governmental	Contribution to the ISO/TC 307 JWG on Blockchain and Distributed Ledger Technologies and IT Security Techniques	<a href="https://www.iso.org/committee/6266604.html">https://www.iso.org/committee/6266604.html</a>		

<b>Standardisation -Governmental</b>	Contribution to the GoQuorum scientific community driving the current implementation of the entire GoQuorum stack	<a href="https://docs.goquorum.consensys.net/en/table/HowTo/Configure/HighAvailability/">https://docs.goquorum.consensys.net/en/table/HowTo/Configure/HighAvailability/</a>		
--	---	---	--	--

Table 3: Key Standardisation-Governmental Actions Tracked in Online Engagement Tracker

#### 4.4.1 Next Targets on Standardisation and Governmental

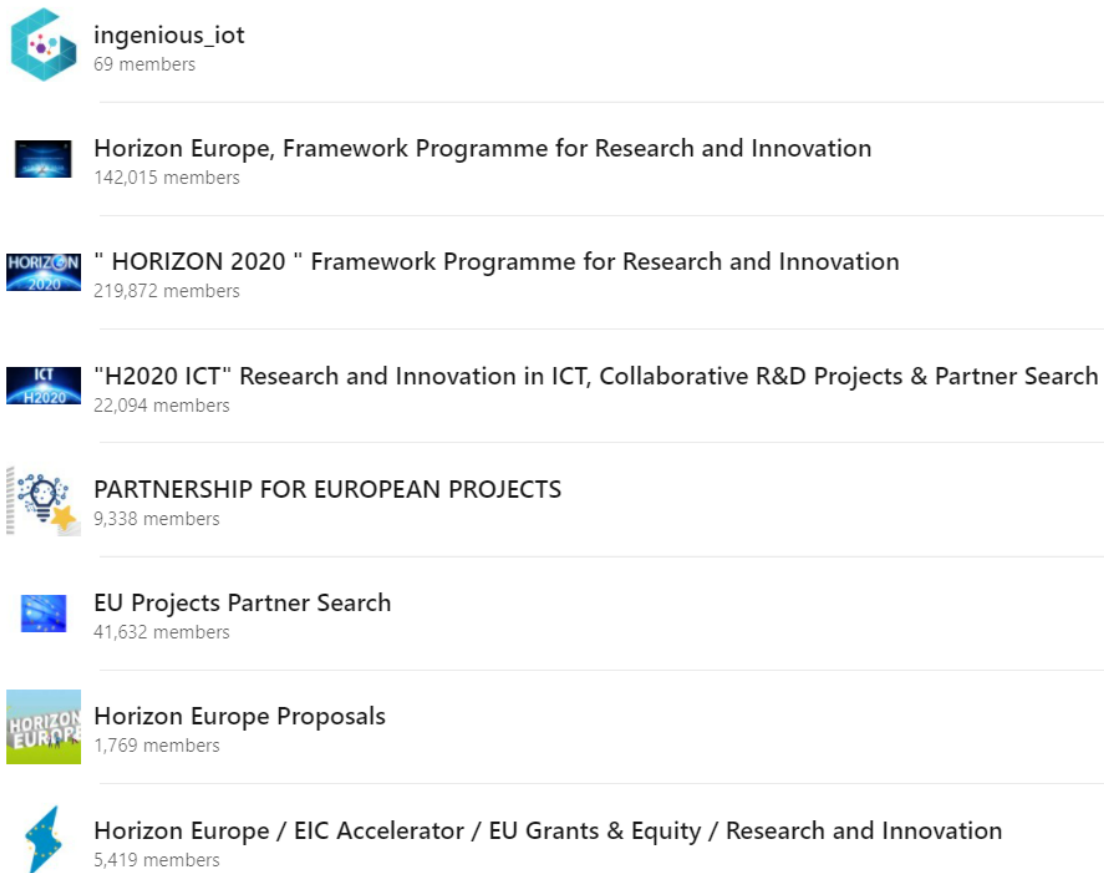

It is obvious that as the delivery date of the present deliverable (M18) coincides with the delivery of the first round of Technical Deliverables (also on M18), so we will have to wait for the project to technically mature for efforts such as Standardisation to be more relevant. For the second half of the project (M19-M36) we have the following proposed targets communicated to the relevant technical partners:

All relevant findings of the project, could be communicated to the corresponding European or International standardisation bodies such as IEEE, W3C, CEN, DIN, OASIS, and ISO, and more indicatively to working groups on:

- 1) Personal Data relevant standards and working groups, as the IEEE P7002TM Data Privacy Process, or the IEEE P7006TM, Standard for Personal Data Artificial Intelligence (AI) Agent.
- 2) Security related standards like those described in the Trusted Computing Group [TCG], the ISO/IEC JTC 1/SC 27 IT Security Techniques committee, the ETSI Cyber Security Technical Committee (TC CYBER).
- 3) Big Data standards such as the ITU standard Y.3600: Big data - Cloud computing-based requirements and capabilities.
- 4) Semantic Web standards (especially W3C Semantic standards) with additions such as metadata and W3C RDF vocabularies and these of Linked Open Vocabularies, schema additions to schema.org etc. around the concepts of creativity and creative industries.

#### 4.5 OTHER NETWORKING OPPORTUNITIES THROUGH H2020 LINKEDIN GROUPS

Although this might be deemed “secondary”, we have not missed the opportunity to seek collaborations and affiliations with projects, associations and research entities through several LinkedIn groups within which DataVaults belongs. We intend to use these as joint opportunities together with the DataVaults Exploitation team (WP7) during the second half of the project.

**Figure 32: Other networking Opportunities through H2020 LinkedIn Groups**

#### 4.6 PROJECT SYNERGIES & LIAISONS: ENGAGEMENT TRACKER ENTRIES

In order to keep track of all the various project / association / cluster entities with which we proceed to common communication and other extrovert activities, a dedicated worksheet in the online dissemination and engagement tracker is in place. We have entries (i.e. columns) trying to keep track of as many possible categories in order to filter them accordingly. We present the “Categorization of Synergies in the Online Tracker” indicative example and also the key activities we look for (i.e. beyond simple social follows-reposts). These take the values:

- Yes (Completed)
- Planned (agreed between 2 projects but not implemented yet)
- Maybe (Partner who has undertaken the liaison has not contacted them yet)
- No (Not applicable, no opportunity for this action given)

The key synergy actions sought after (and tracked) are:

Key Liaison Activity	Total Count (note each entity may have more than one synergies)
Total Entries at the time of writing the deliverable	37

Common Post made in Social Media and / or 3 <sup>rd</sup> party Event	18 out of 37 done (others agreed but not implemented yet by other party) Several more to come.
Exchange of links and logos in each other's websites	24 agreed, more to come shortly
Liaison party received a copy of the DataVaults online Survey as external stakeholder to provide feedback	16
Common Event or Webinar with DataVaults and Liaison Member (Organized or Common Participation)	21 (mentioned in the events-workshops section)

Table 4: Key Synergy Actions Tracked in Online Engagement Tracker

PROJECT AFFILIATIONS-LAISONS-SYNERGIES-COMMUNITIES										DataVaults	
Type of Affiliation	Name	URL	Social (Common) event Reports Likes	Website Link Exchange	Common Event	Received Synergy stakeholder Feedback	Received Material Presentation	Other Joint Activity	Comments		
Association-Cluster	BDVA / DAIRD	<a href="https://www.bdg-data-value.eu/">https://www.bdg-data-value.eu/</a>			Yes			newsletter, posts, Webinar, Workshop	CSA supporting BDVA. Atos is partner. A project funded under the same topic as DataVaults. Federating data		
Project Synergy	I3-Market	<a href="https://www.i3-market.eu/">https://www.i3-market.eu/</a>	Yes	Yes	Yes	Yes	Yes	posts, workshop, BDVA DataWeek			
Project Synergy	Kraken	<a href="https://krakenproject.eu/">https://krakenproject.eu/</a>	Yes	Yes	Yes		Yes	Common Workshop	Smart Cities MarketPlace Initiative		
Project Synergy	DataBench	<a href="https://www.databench.eu/">https://www.databench.eu/</a>	Yes	Yes	Planned		Yes	Definition of the architecture based on mappings to DataBench blueprints. Planned publication of the blueprint in the DataBench Toolbox			
Project Synergy	Reachout	<a href="https://www.reachout-project.eu/view/fullain">https://www.reachout-project.eu/view/fullain</a>	Yes	Planned				Survey Designed on Reachout Platform			
Project Synergy	GLASS	<a href="https://www.glass-h2020.eu/">https://www.glass-h2020.eu/</a>	Yes	Planned	No	Yes	Yes	Common Partners as Stakeholder Feedback			
Project Synergy	FutureTPM	<a href="https://futuretpm.eu/">https://futuretpm.eu/</a>	Yes	Planned	Not Yet		Yes	Presentation of QR-TPM context by FutureTPM proposed project entitled "services for the citizen" I	Suite5 is involved in the project		
Standardisation-Governmental	UNIANEX in relation to CEN, CENELEC and ETSI	<a href="https://www.etsi.org/technologies/smart-cities">https://www.etsi.org/technologies/smart-cities</a>							Creating a group to feed in regarding citizen control of data.		

Figure 33: Categorisation of Synergies in the Online Tracker

Indicative entries, not mentioned yet in the logo-website link exchange above, but already reached, and planned to be added imminently (within the next weeks), include among others:

Liaison to be added in Link Exchange	URL
data.europa.eu	<a href="https://data.europa.eu/en">https://data.europa.eu/en</a>
Urbanite	<a href="https://urbanite-project.eu/">https://urbanite-project.eu/</a>
DECIDO	<a href="https://www.decido-project.eu/">https://www.decido-project.eu/</a>
Reflow	<a href="https://reflowproject.eu/">https://reflowproject.eu/</a>
XMANAI	<a href="https://ai4manufacturing.eu/">https://ai4manufacturing.eu/</a>
DataBench	<a href="https://www.databench.eu/">https://www.databench.eu/</a>
DOME4.0	<a href="https://dome40.eu/">https://dome40.eu/</a>
STAR AI EU	<a href="https://star-ai.eu/">https://star-ai.eu/</a>
SafeDEED	<a href="https://safe-deed.eu/">https://safe-deed.eu/</a>

Table 5: Next Additions in the Link Exchange – Synergies Page

#### 4.6.1 Clarification for Online Tracker Tables

A clarification is in order between:

- the online tracker table “Project Affiliations-Synergies” (the subject of this chapter), and
- the online tracker table “Industry Links-Market Liaisons” (i.e. the subject of the next chapter)

We distinguish entities reached through our networking efforts in the two main categories:

- If they are affiliated H2020 projects, associations, standardization bodies, (example BDVA or Smart cities marketplace, Major Cities of Europe etc.) with which we can make common dissemination, common events-webinars, common promotion etc. then they are inserted in “Project affiliations-Synergies”.
- If they can provide data and/or consume data and/or seek data, then they are industry and exploitation targets for adopting our platform or contributing to our platform, then they are inserted into “industry links”. Hence, these include companies, universities, municipalities, and other types of similar entities that have and/or consume, and/or seek data (since this is our focused industry after all for exploitation stages).

Of course an entity can exist in both categories.

## 5 DIRECT INDUSTRY LINKS – TARGET ORGANIZATIONS - MARKET LIAISONS

We requested DataVaults partners to activate their pre-existing network of clients, vendors, collaborators, affiliates, friends and speak about our project providing information and presentations but most importantly identify industry links - target organisations that can :

- 1) Become potential adopters of our platform (which relates directly to exploitation stages as well).
- 2) Provide and /or Consume Data as owners and/or seekers
- 3) Were willing to participate in our Stakeholder feedback and evaluation stages
- 4) Were willing to fill our relevant online multilingual survey
- 5) Can participate in common events with demonstrations of the platform and/or our workshops

DataVaults envisions to link directly to the market, and we consider our “industry” to be the data industry with its multi-sided stakeholders (data owners/providers and data seekers/consumers), which arguably can be found in diverse fields among companies, governmental entities, academia and other related “target organisations”.

The partners have yielded a **total of 220** entries that can be found in the **Appendix A1**. These are entities that the partners have either already engaged with, or have undertaken the responsibility to engage and reach out to, in our effort to achieve the widest possible impact of our project’s and data platform’s outcome.

These fall into categories of: Direct links, Found through common projects (non-common partners), Companies, Academic Institutions, Municipalities or other Governmental Entities, Associations etc. We remain confident that the foreseen KPI of 300 in the GA will be exceeded by M36.

The figure below indicates the layout and categories of the worksheet in the tracker with the strategic partner [www.MyDataMood.es](http://www.MyDataMood.es) with which we have already achieved a series of events, common posts and a webinar.

COMPANIES-INDUSTRY LINKS

Scope: Organisations (corporate or other) to which we spoke about DataVaults and:

a) could become data consumers/seekers or data owners/providers or

b) Could provide valuable input as stakeholders (example survey)

ID	Partner Engaging	ORGANISATION - INDUSTRY LINK	COUNTRY	LINK ORIGINATING FROM	URL	Given Project Info	Common Event	Stakeholder Feedback / Survey Given	Potential Data Owner/Provider	Potential Data Seeker/Consumer	Potential DataVaults Platform Adopter	Comments
1.	ATOS	Mydatamood.es	Spain	Direct Contact	<a href="https://mydatamood.com/">https://mydatamood.com/</a>	Yes	Yes	Yes	Maybe	Maybe	Maybe	Strategic Affiliation-Common Events

**Figure 34: Indicative Industry Links / Targets in the Engagement Tracker**

In the appendix we only provide the names of the organisations and the source without further information due to obvious sensitivity, privacy and GDPR issues.

## 6 PUBLICATION BASED ACTIVITIES

### 6.1 SCIENTIFIC PUBLICATIONS

As mentioned previously, the delivery date of the present deliverable (M18) coincides with the delivery of the first round of Technical Deliverables (also on M18), so we will have to wait for the project to technically mature for efforts such as Scientific Publications (Journals-Conferences) to be more relevant.

Nevertheless, we have already achieved two (2) entries in the publications worksheet of the Dissemination and Engagement Tracker:

The first is a **book chapter** by ETA "The Big Data world: benefits, threats and ethical challenges" in the OA volume "Ethical Issues in Covert Research and Surveillance" within the Advances series. The publication is a bit in delay since other authors have not provided their finalized version yet, but the editor has confirmed that the online version should be available by October. DataVaults is explicitly mentioned and our "sharing the wealth" paradigm and the potentialities of a new ethically-driven business model relying on personal data.

The second is a **Publication in Conference proceedings/Workshop** by IFAT, (Authors Köberl, Alexander / IFAT: Steger, Christian) planned for 23.08.2021 entitled "Providing efficient access to private Smart Contracts on Consortium Blockchains".

Please provide a DOI for the publication (recommended) or fill-in the rest of the required information.

No.	Partner	PLANNED / COMPLETED	Title *	Place of publication *	DOI	Type of publication *	Repository link	Link to the publication	Authors/affiliation *	* Mandatory field Title of the Journal/Proceedings
1	IFAT	PLANNED	Providing efficient access to private Smart Contracts on Consortium Blockchains	IFAT	23.08.2021	Publication in Conference proceedings/Workshop			Köberl, Alexander / IFAT: Steger, Christian	
2	ETA	Planned	"The Big Data world: benefits, threats and ethical challenges" in the OA volume	Advances series	N/A	OA Volume			Marina Da Bormida (ETA)	Advances

Figure 35: Scientific Publications in the Online Tracker

#### 6.1.1 Next Steps - Planned

For the second half of the project (M19-M36) once the project will have technically matured, it is clear that strong effort will have to be devoted in order to reach the KPI targets mentioned in the GA, i.e. Conference publications  $\geq 15$  and Journal papers  $\geq 4$ .

The consortium has identified the following proposed targets communicated to the relevant technical partners with emphasis on Academics:

Potential academic conferences considered include: IEEE INFOCOM, IEEE BIG DATA, ICBDA, IEEE BDSTA, VLDB, ACM SIGMOD, ICDE, DaWaK-DEXA, ESWC, ECIS, IEEE/WIC/ACM, ICWE, CCS.

Candidate journals include: IEEE Transactions on Knowledge & Data Engineering, Journal of Big Data (Springer), Big Data Research (Elsevier), International Journal of Big Data Intelligence, IEEE Transactions on Big Data, Big Data and Information Analytics (BigDIA) etc.

#### 6.1.2 Open Access Policy

By adhering to the EC Guidelines on Open Access to Scientific Publications and Research Data in H2020, DataVaults wishes to follow a combination of Gold and Green Open Access strategy to its scientific publications. Gold Access will be encouraged for high-impact journal

publications while the self-archiving, Green Access will be granted for the rest of the publications.

## 6.2 BLOGPOSTS

### 6.2.1 DataVaults Blog

The DataVaults Blog has been quite active and we have so far **21 blog posts**

**Figure 36: DataVaults Blog Posts in News Section**

#### 6.2.1.1 Upcoming Blogposts based on M18 Technical deliverables

Furthermore, since most “Technical” deliverables are being submitted in tandem with the present document (M18) it is agreed that each deliverable will produce a “summary of results” accompanied with an indicative graphic that will be an independent blogpost in our website. These should be uploaded sometime during the summer (end of August) according to the plan (adding **another 8 entries** to the list):

- 
- D1.4 Updated DataVaults Concept Definition - **ATOS**
  - D2.2 Personal Data Market Design, Contracts and Rules - **ETA**
  - D2.3 Updated DataVaults Security Methods and Market Design - **ETA**
  - D3.1 Security, Privacy and Trust Bundles - Version 1 - **IFAT**
  - D4.1 Data Sharing, Value Generation and Intelligence Bundles - Version 1 - **SUITE5**
  - D5.2 System Architecture, Bundles Placement Plan and APIs Design - **FRAUNHOFER** (as this deliverable is confidential, the blogpost could include architecture information that has already become public through the videos, webinars etc)
  - D6.1 Project and Pilots Evaluation and Impact Measurement Plan – **ASSENTIAN**
  - D6.2 Pilot Scenarios and Implementation Plan – **MAGGIOLI**
- 

### 6.3 BLOGPOSTS IN EC MECHANISMS (CORDIS)

The GA foresees a KPI of six (6) blogposts in EC Mechanisms. Apart from the posts within the EC Smart Cities Marketplace, we have also another blog post at CORDIS:

<https://cordis.europa.eu/event/id/148435-bdve-webinar-bringing-back-personal-data-value-to-the-rightful-owners>

We will also seek posts within the Citizen Personal Data Initiative and the EC Smart Cities Marketplace due to our strong collaboration as well as several other EC mechanisms wherever possible.

## BDVe Webinar – Bringing Back Personal Data Value To The Rightful Owners

This webinar will focus on how such concerns that pertain to privacy, ethics and intellectual property rights can be tackled, by allowing individuals to take ownership and control of their data and share them at will, through flexible data sharing and fair compensation schemes with other entities (companies or not), as researched by the DataVaults project.

DIGITAL ECONOMY

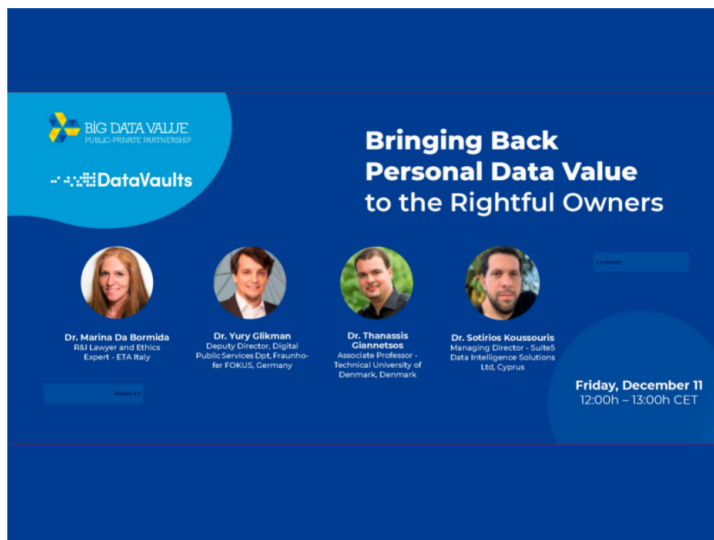

SOCIETY

SECURITY

11 December 2020 - 11 December 2020  
Online, Germany

© BDVe

Big Data lay at the core of the strong data economy that is emerging in Europe. Although both large enterprises and SMEs acknowledge the potential of Big Data in disrupting the market and business models, this is not reflected in the growth of the data economy. The lack of trusted, secure, ethical-driven personal data platforms and privacy-aware analytics, hinders the growth of the data economy and creates concerns. The main considerations are related to the secure sharing of personal and proprietary/industrial data, and the definition of a fair remuneration mechanism that will be able to capture, produce, release and cash out the value of data, always for the benefit of all the involved stakeholders.

### Related projects

## 6.4 PRESS RELEASES – NEWSLETTERS – INDUSTRIAL MAGAZINE ARTICLES-COMMUNICATION MATERIAL

This part of the communication-dissemination strategy has intentionally been postponed for the second half of the project (M19-M38) for two main reasons:

### 6.4.1 COVID 19 Restrictions

First, the well-known COVID19 situation that has impacted the entire planet has restricted all physical presence. We have hence shifted our efforts on the online part rather than the

“physical part”. All “physical” events such as exhibitions, demo booths, physical presence events etc. (and hence the accompanying material such as printed flyers, banners etc.) had no applicability until M18

#### 6.4.2 Finalization of Technical Aspects after M18

Second, the delivery date of the present deliverable (M18) coincides with the delivery of the first round of Technical Deliverables (also on M18) which are still at “design stage”, so we will have to wait for the project to technically mature for efforts such as publications based on deliverables, demo booths, demonstrator events, articles in industry magazines with results etc. to be more relevant.

For the above reasons, we will devote our effort in the last year of the project for the foreseen KPIs / targets on:

1. Roll-ups, printed flyers, banners and brochure to be disseminated in booths, expos and events, (i.e. project’s Event Toolkit) which will be combined with the complete Marketing Pack as a kit (the outcome of D7.3 in M28), when physical “demonstrative” events will take place
2. Likewise, we will wait for the technical work-packages to have some “tangible” and “demonstratable” results to show so that we can proceed with “traditional media” dissemination.

However, we note that a big part of the communication material has already been **completed since M3** (reported in D8.1 and D8.2), namely logo, social banners, digital accompanying graphics pack, templates, brand identity, so they are not repeated here.

#### 6.4.3 Progress until M18

Despite the above, we are in the pleasant position to report that until today:

##### 6.4.3.1 Press Releases on media

- 5 press releases already are completed by partners in the media

press release	<a href="http://comunicati.comune.prato.it/generali/?action=dettaglio&amp;comunicato=14202000000155">http://comunicati.comune.prato.it/generali/?action=dettaglio&amp;comunicato=14202000000155</a>

Table 7: Partner Newsletters

#### 6.4.3.3 DataVaults Newsletter and Initial Mailing List

First we have devised a personal contact list serving both as a mailing list and a direct contact directory for networking purposes. Obviously due to GDPR issues we cannot disclose the names and contacts, as the list is confidential. It consists not only of internal partners but mainly of key stakeholders and important liaisons or collaborators of DataVaults.

Second we already have in place our newsletter account with Moosend.com, and the upcoming newsletter to be disseminated in the summer is promoting our recently launched Videos about the demonstrators in our YouTube Channel. Due to most Technical deliverables being submitted after M18, most content will be available for newsletters right afterwards. Nevertheless, the dissemination team has the structure ready for one newsletter on the videos and another one for the upcoming series of workshops in September. Hopefully in the second half of the project the target of >6 newsletters will be exceeded.

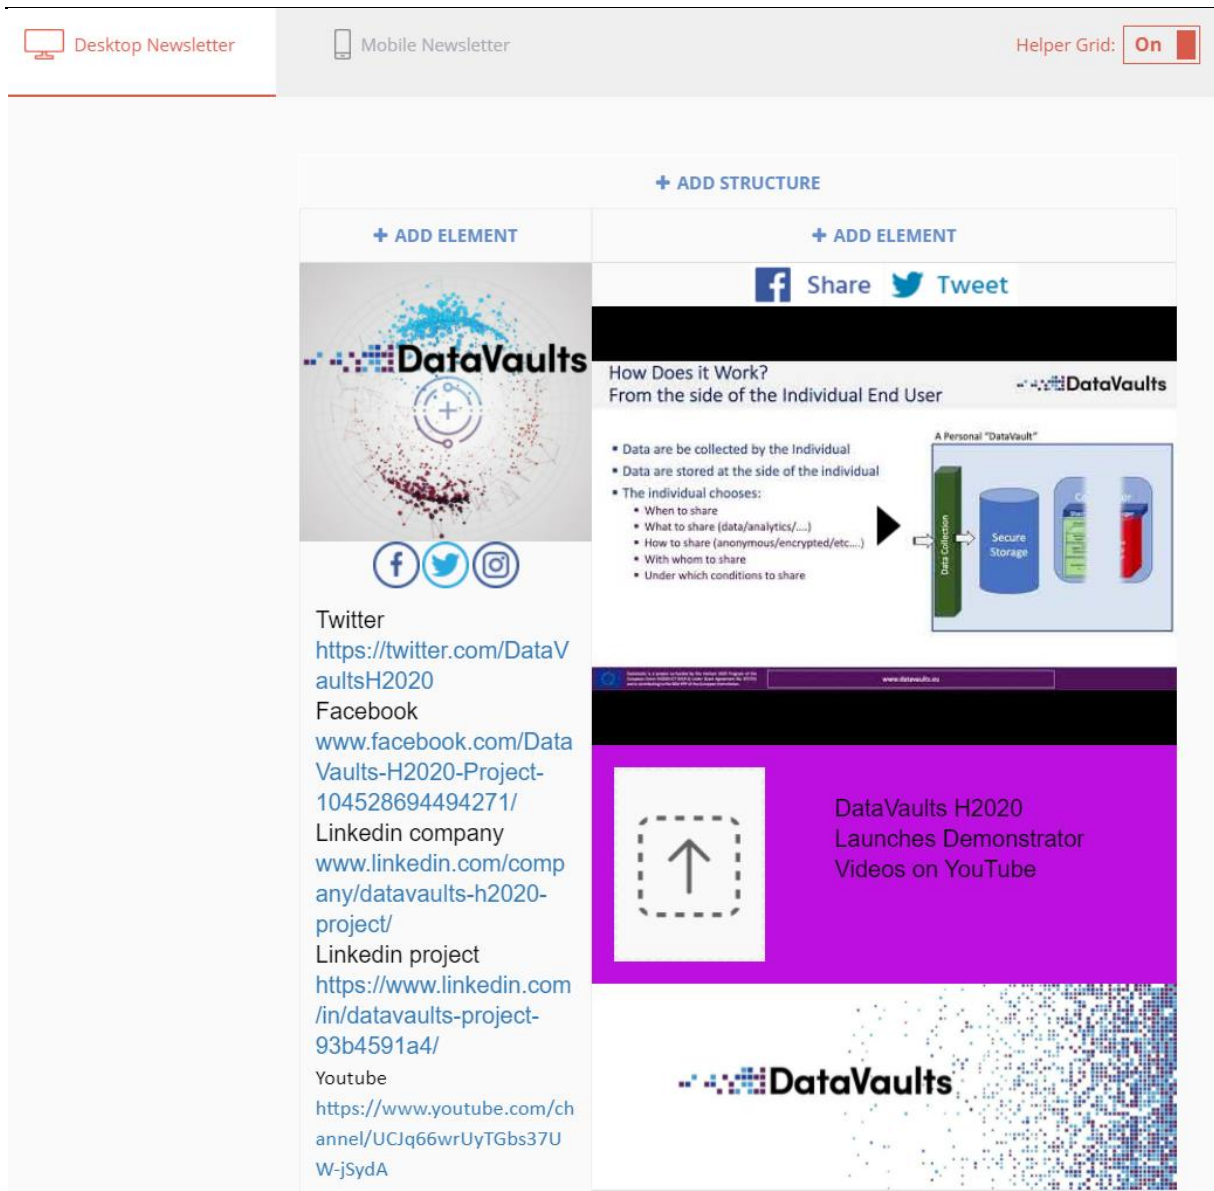

Figure 38: Moosend Newsletter preparation for the Demonstrator Videos on YouTube

Personal Contact List-Mailing List					DataVaults
Scope: Directory of Personal Contacts. For general DataVaults Use and Initial Mailing List, as well as future exploitation

Figure 39: Mailing List – Contact Directory (CONFIDENTIAL due to GDPR)

## 7 OTHER IMPORTANT DISSEMINATION-COMMUNICATION ACTIVITIES

### 7.1 INDIVIDUAL PARTNER DISSEMINATION ACTIONS

We have a dedicated worksheet in the online engagement and dissemination tracker devoted to all other dissemination activities that partners are performing. The categorization to keep track is shown in the following image.

OTHER DISSEMINATION ACTIVITIES	
Please insert relevant data for other dissemination activities such as:	
- press release	
- non-scientific and non-peer-reviewed publication (popularised publication)	
- flyer/leaflet/poster/factsheet	
- website	
- communication campaign (TV and radio broadcasting, podcast)	
- video/film	
- interview	
- conference paper/abstract (non peer-reviewed)	
- newsletter	
- blog post /social media post	
- Print Media/Magazine	

Figure 40: Categorisation of Other Dissemination Actions by Partners in the Online Tracker

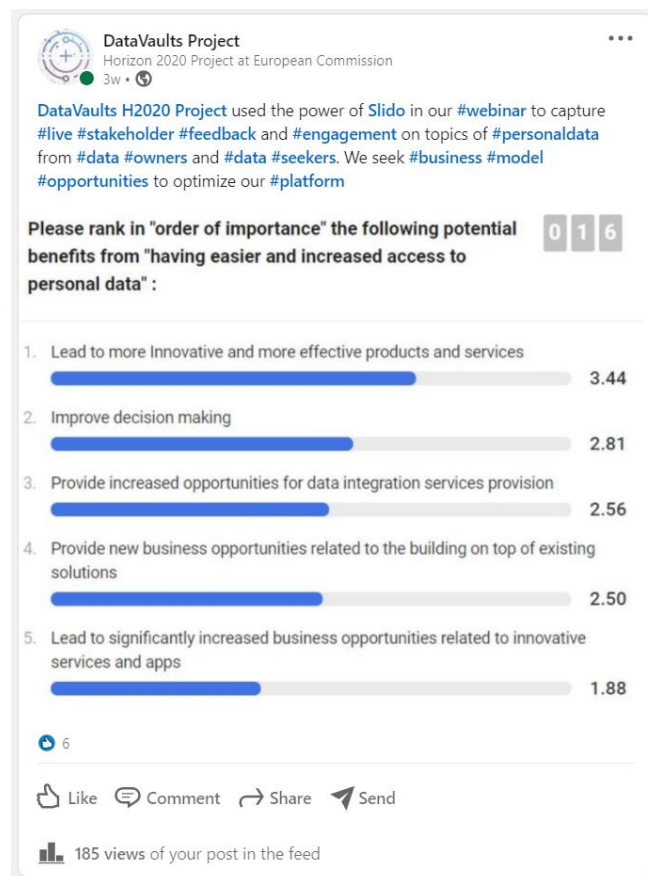

At the time of writing, the tracker has **165 entries**.

Due to the large size, the table is inserted as **APPENDIX A3** in the end of the document.

### 7.2 STAKEHOLDER FEEDBACK AND EVALUATION SUPPORT

The Dissemination and Communication team of WP7 has also provided support in various other WPs that required not only promotional but direct assistive contribution. We provide some prominent examples below.

### 7.2.1 Using Sli.do Audience Interaction and Survey Tool for Live Stakeholder Feedback in Webinar

**Figure 41: Sli.do Audience Interaction Tool used in recent Webinar for Live Stakeholder Feedback Analysis**

During the recent BDVA webinar “Easy Access to Personal Data: Removing Obstacles to Unleash the Value in the Sharing of Personal Data” (on 11-06-2021 as mentioned previously), the dissemination team used the collaborative and Audience Interaction Tool sli.do to capture live during the webinar feedback from participants using surveys with Likert Scales. More on this is reported in WP6 deliverables. The image indicates one (1) of the totally ten (10) graphs produced during two (2) Interactive Sessions. More on this activity is reported in WP2 and WP6.

### 7.2.2 The DataVaults Word-Cloud

It was in the same event, using the same interactive tool that the dissemination team managed to extract the DataVaults “Word-Cloud” from direct webinar participants feedback. More on this is reported in WP6, and the dissemination team has tried to assist in a multitude of ways towards the efforts of WP2 and WP6 to capture stakeholder feedback during the evaluation plan for the demonstrators. Of course, we have used this graphic in various social media posts as well.

Figure 42: Sli.do extracted DataVaults Word-Cloud through Audience Interaction in recent Webinar

Figure 43: Word-Cloud indicative Social Post

### 7.2.3 Multilingual Online Survey Promotion Boost

We have tried to assist the efforts for the widest possible reach of our DataVaults Multi lingual Online Survey. The Dissemination team support was in 3 different steps

- 1) Include the link in the website and in many repetitive posts

See: <https://www.datavaults.eu/citizens-perspective-on-data-sharing-survey/>

- 2) Reach out to a total of **16 affiliated projects and companies** through the UNISYSTEMS network, so that we would be able to achieve as many diverse respondents as possible
- 3) Boost the posts about the survey during the last days that it was live, with paid social ads. The results were evidently boosted as shown in the next graphs, but not to a very strong level (at least not as much as expected), as opposed to the “free” promotion that was running for two months (approximately 500 reached with 18 engagements).

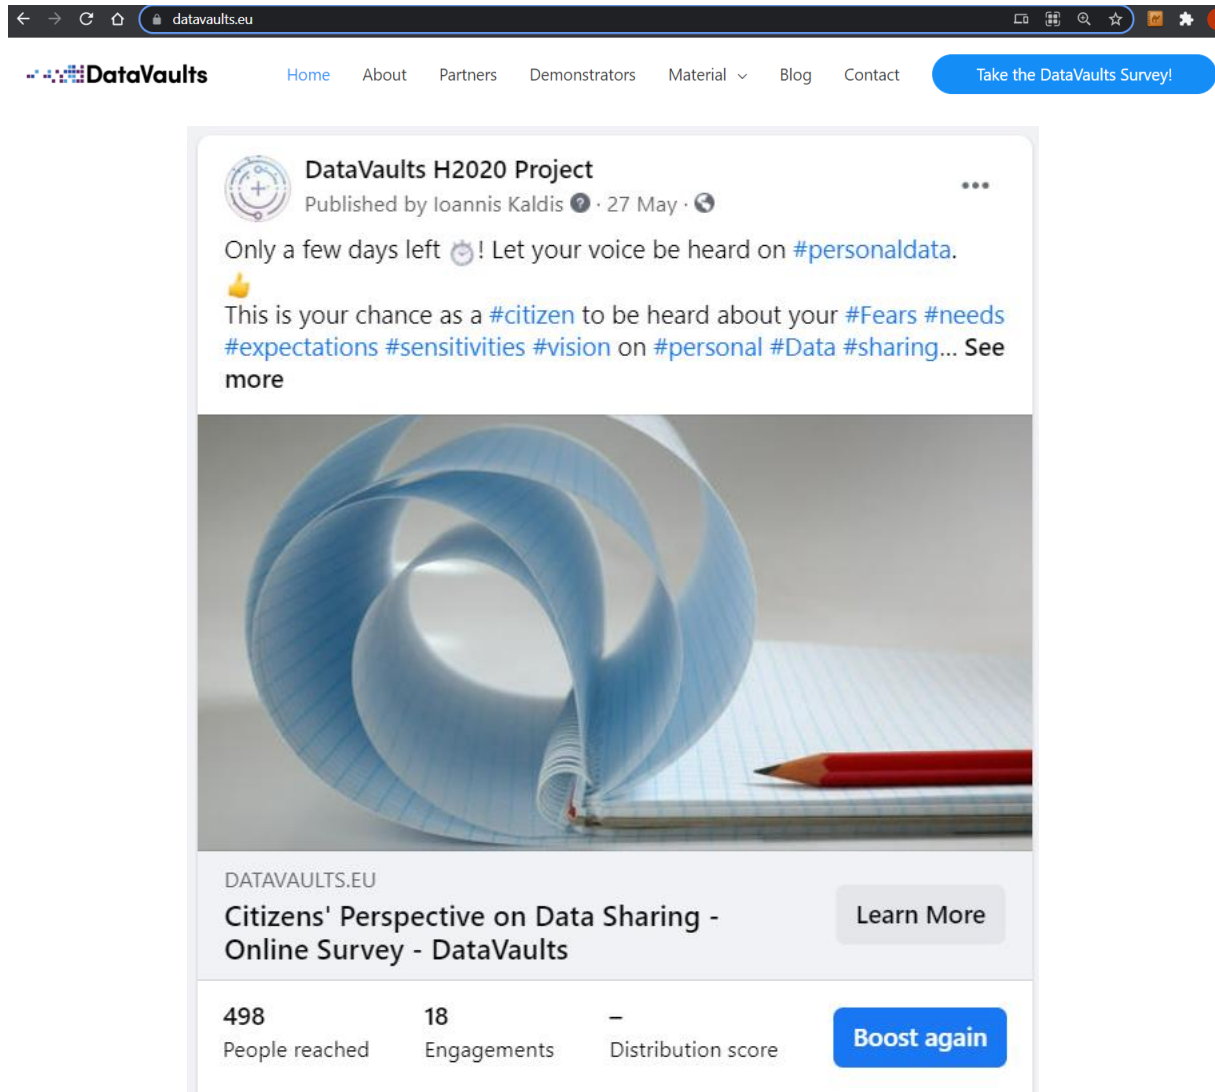

Figure 44: Promoting the Online Survey of DataVaults

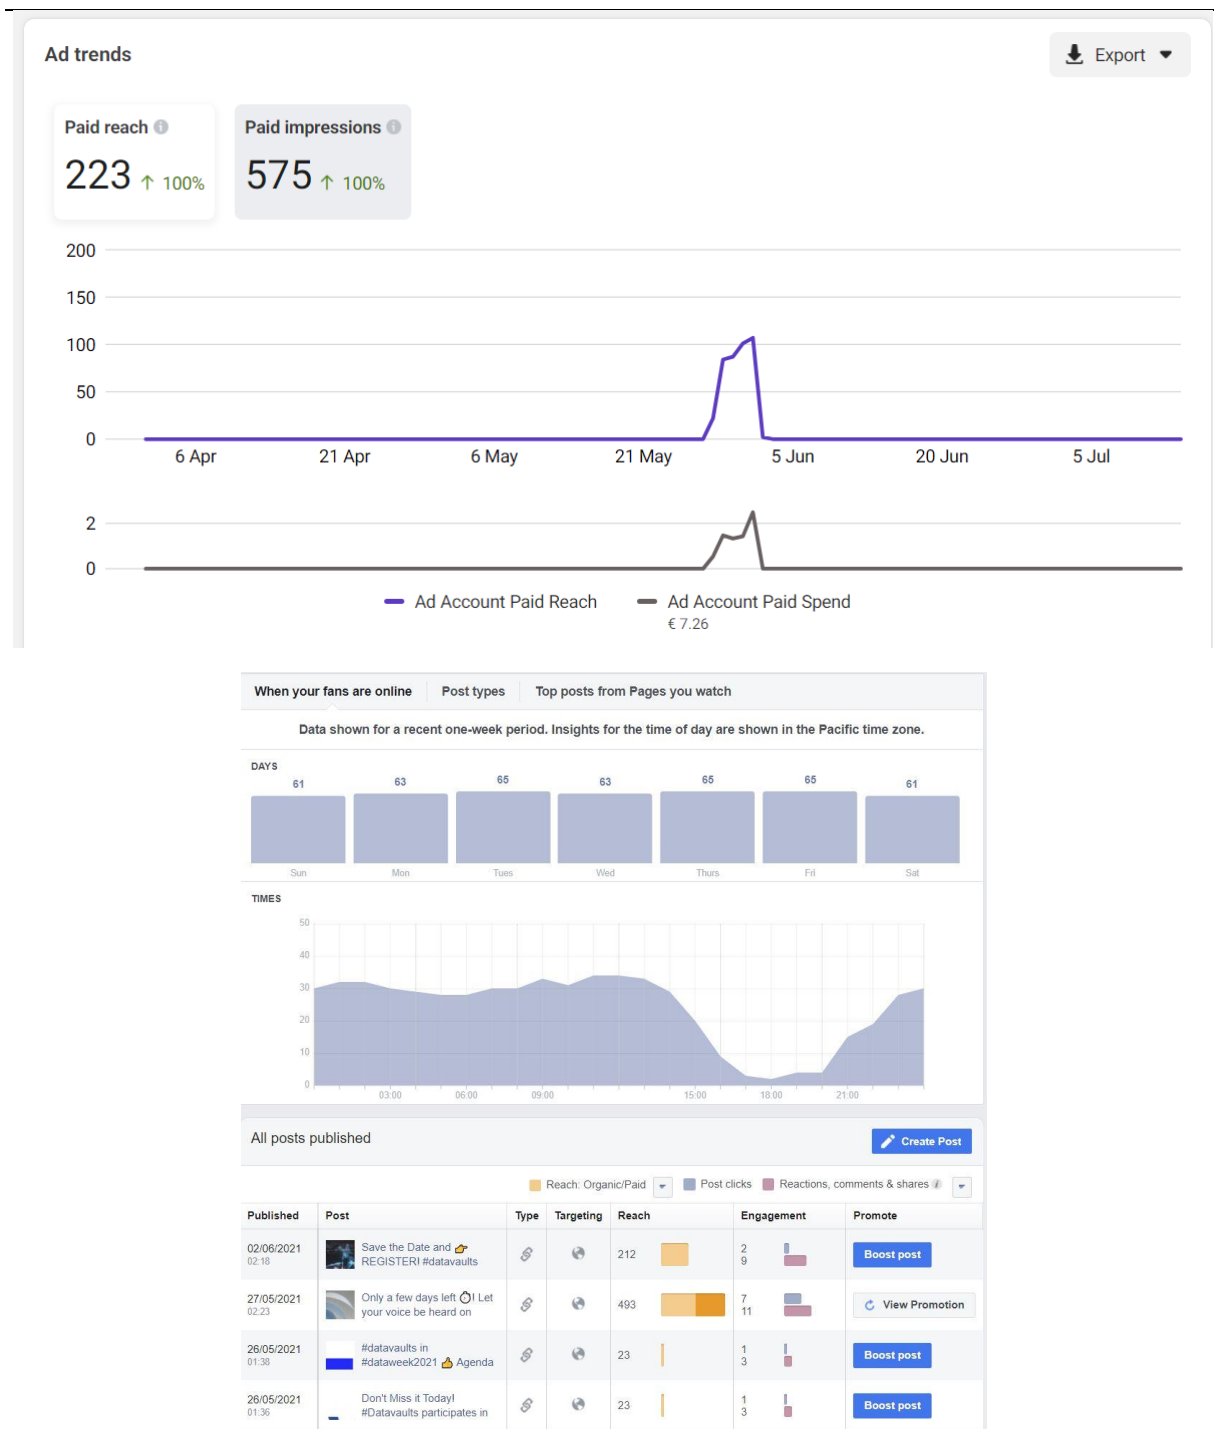

Figure 45: Statistics of Boosting the Online Survey of DataVaults in Social Media

## 8 MONITORING, METRICS, TARGETS, KPIs

We summarize the activities and achievements through a master KPI table as it was initially presented in D8.1. which gathered the various KPIs mentioned in the GA.

### 8.1 ADAPTATIONS TO THE PLAN

No large deviations or risks are observed or foreseen for the near future. The only adaptations to the overall plan submitted in D8.1 are related to the aforementioned:

- 1) COVID19 situation prohibiting all “Physical Presence” Events, which by definition means that all events such as exhibition, Booths, and the related accompanying material (roll-up, poster) are pushed to the second half of the project (M19-M38)
- 2) The core Technical deliverables are submitted in M18 (concurrently with the present deliverable) so practically all activities that require “tangible” and demonstratable results (example demo platform, technical articles etc.) are beginning in this second half of the project.

#### Advancements:

On the other hand many KPIs have **already been reached or even exceeded** by the first half of the project. We will continue with strong efforts in the second half to expand them even further.

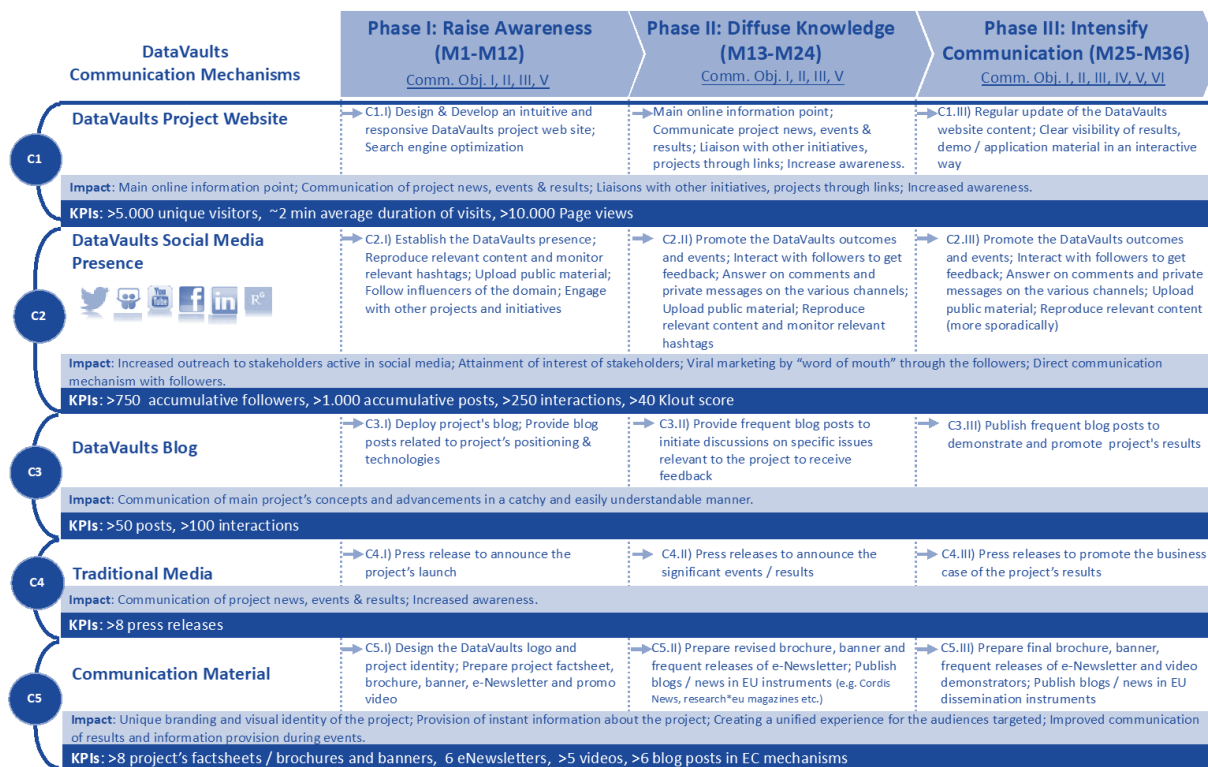

Figure 46: DataVaults Communication Mechanisms and Impact Activities

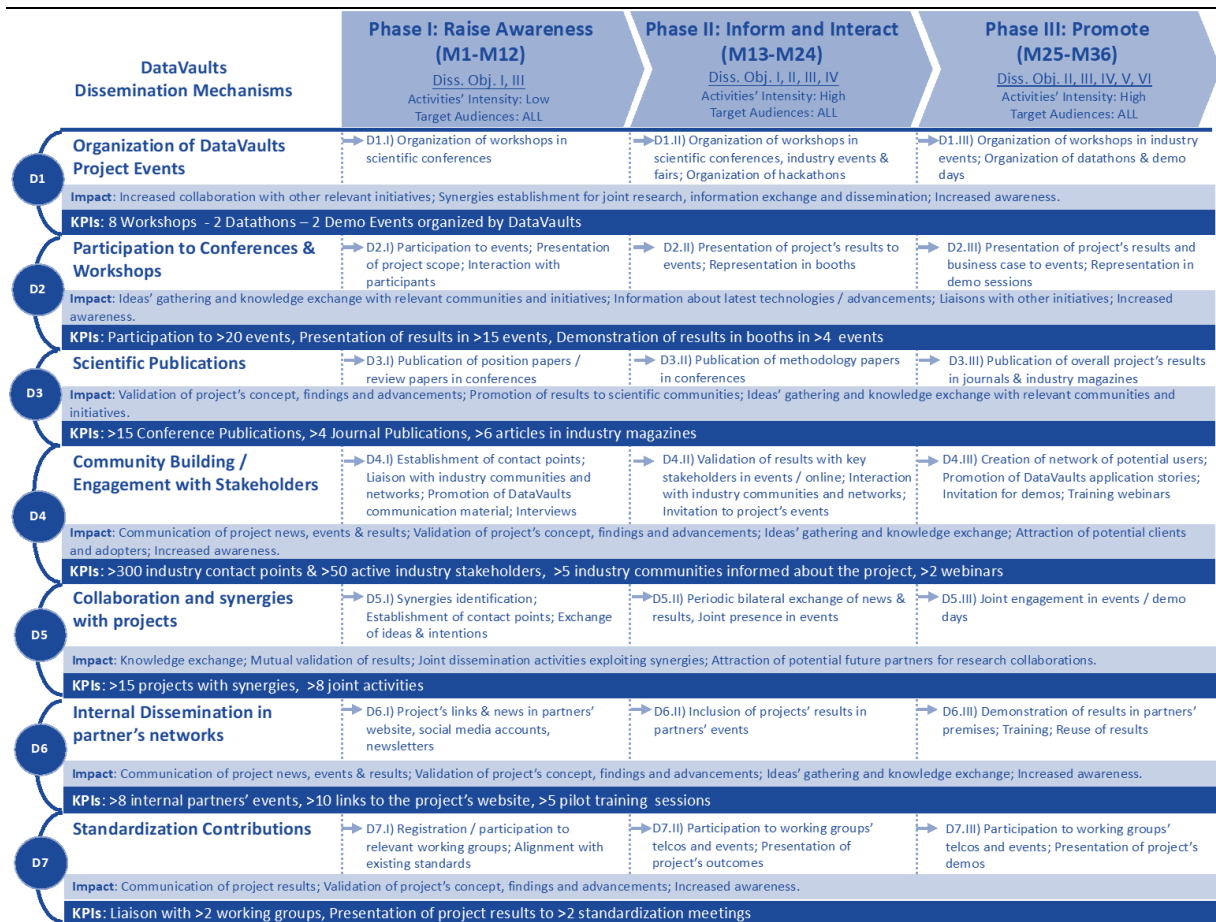

Figure 47: DataVaults Dissemination Mechanisms and Impact Activities

## 8.2 METRICS, TARGETS, KPI TABLE

**Note:** due to typographic error in the GA, there were 2 discrepancies in the KPIs and we have chosen to keep the “bigger” ones. (Example: “Industry Communities informed appear as 5 in the Plan and as 10 in the GA text, and we have chosen to keep 10 to push for more results. Likewise Standardisation meetings are mentioned as 3 in the text and 2 in the Plan Graphic, but we have opted for the larger i.e. 3 in total).

Impact Metric – KPI	Target	STATUS on M18	Comment / Plan for M19-M36
<b>Workshops organized</b>	>=8	<b>Total 6</b> 4 Citizen Control of Personal Data Initiative + 2 with BDVA

Table 9: DataVaults Communication Material Analysis

## 9 CONCLUSIONS

For the interim version of the dissemination-communication deliverable, which coincides with the delivery of the first version of most technical deliverables, we are in the pleasant position to report a strong online presence and a series of synergies and affiliations, industry links and stakeholder feedback for the purposes of supporting work packages dealing with demonstrator evaluation. Key achievements include the workshops and webinars that were organized with our strategic partners BDVA, Citizen Personal Data Initiative and Major Cities of Europe, as well as several videos produced. Notably the engaged industry links, the project affiliations, the overall events list, the internal partner dissemination activities and the common dissemination synergies with our ever-expanding network of 3<sup>rd</sup> party stakeholders and projects are helping us reach and often exceed the initially set target and KPIs. Hoping that the COVID19 situation will allow us to proceed with physical presence activities concurrently with the gradual maturity of the technical parts of the project which conveniently is planned for the second half of the project, we aspire to continue our extrovert efforts and to fulfil the vision of DataVaults to become a focal point of knowledge diffusion and to deliver real value to data owners.

## APPENDIX A:

### APPENDIX A1: ENGAGED INDUSTRY LINKS – MARKET TARGETS TRACKER

**Note:** the 5 Pharma companies and the 7 partners companies engaged by Andaman 7 are subject to NDA (Non-Disclosure Agreements) and cannot be mentioned in writing but references of the contacts made and the material given can be brought upon request of the PO from the partner.

**Note 2:** Due to obvious GDPR reasons we are only mentioning the names of the organisations that our partners engaged without any disclosure of personal data of any form.
